**Signature of Student** **Seal & Signature of IPO**

# ACKNOWLEDGEMENT

I express my sincere gratitude to RK NEXORA, RKNEXORA PRIVATE LIMITED, _____ (College Name), my faculty mentors and the internship supervisor, _____, for their guidance and support. The structured activities, learning resources and regular feedback helped me complete this internship in Banking Operations successfully.

I am thankful to the Head of the Department and the college mentor for their encouragement and for guiding me in preparing this report. I am also grateful to the management of RKNEXORA PRIVATE LIMITED for providing a professional learning environment and the opportunity to learn and apply my knowledge in a practical setting. The concept sessions, hands-on tasks with sample forms, slips and dummy records, and the supervisor's patient and detailed feedback helped me understand how a bank branch works behind the counter.

Finally, I thank my family and peers for their constant encouragement throughout the programme.

# PREFACE

Internships are an important part of the undergraduate programme, as they allow students to see how classroom learning is applied in real organisations. The Four-Year Undergraduate Programme (FYUGP), introduced in line with the National Education Policy 2020, gives special importance to experiential learning, skill development and employability. This report has been prepared as part of the internship requirement of Magadh University and the Higher Education guidelines applicable in Bihar.

The report describes the internship undertaken in Banking Operations at RKNEXORA PRIVATE LIMITED, the plan followed, the work carried out, and the learning gained. Banks touch the daily life of almost every family - through savings accounts, loans, cheques, cards and UPI payments - and the safe and smooth working of a bank depends on careful operations behind the counter: verifying identity, handling cash, posting transactions, following regulations and resolving complaints. This internship offered a first-hand introduction to that side of banking.

The report has been arranged in the order suggested by the University, beginning with the cover page and acknowledgement and ending with the conclusion and attendance sheet. It is hoped that the report gives a clear and honest account of the internship experience. All examples in it use dummy data and fictitious names; no real customer information was handled.

# EXECUTIVE SUMMARY

This report documents the internship completed in Banking Operations at RKNEXORA PRIVATE LIMITED (RK NEXORA - 'Campus to Career'). The programme required a minimum of 120 hours, completed over about four to five weeks (28 working days) with daily sessions of four to five hours, and was supported by an attendance log, supervisor guidance and review.

**Background.** A bank accepts deposits from the public and lends the money to people and businesses, while providing payment, remittance and other services. Banking operations are the day-to-day activities that make this possible: opening accounts after proper KYC, handling deposits and withdrawals, processing loans and cheques, running digital payments, following RBI rules, preventing fraud, resolving complaints and recording everything in the core banking system. For a student from any discipline, the internship shows how accuracy, trust, rules and technology work together in a financial institution.

**Objectives.** The internship aimed to (i) build a structured understanding of the banking system and the role of the RBI, (ii) learn account opening, KYC, deposits and withdrawals, (iii) understand the loan and credit process and cheque clearing, (iv) learn digital banking and UPI, (v) understand banking regulations, fraud awareness, customer grievance handling and core banking systems, and (vi) develop communication, documentation and professional discipline.

**Work carried out.** The student first studied the structure of the banking system, then worked through account opening and KYC, deposits and withdrawals, loans and the credit process, digital banking and UPI, cheques and clearing, RBI regulations, fraud awareness, customer grievance handling and core banking systems. Each topic had a concept session followed by a hands-on task using sample forms, slips and dummy records. The later part of the programme was devoted to a case study, a mock practical exercise, supervisor review and preparation of this report.

**Project.** The work was tied together in a project titled *Banking Operations & Customer Services Study*, in which account opening, KYC, loans and digital banking processes were studied with hands-on documentation practice.

**Method.** A blended method was followed - learn, practise, document and review - supported by a daily attendance log with day-wise remarks and regular feedback from the supervisor.

**Learning gained.** The student gained a clear understanding of how a bank branch works, practical familiarity with KYC checks, slips, cash balancing, EMI and interest calculation and cheque verification, awareness of RBI rules, customer rights and digital safety, and improved communication, accuracy and professional discipline.

**Key observations.** Correct KYC and records protect both the customer and the bank; digital convenience needs careful security habits; and a polite, quick response to complaints builds trust.

**Conclusion.** The internship met its objectives and contributed to the student's academic understanding, employability and confidence. The report follows the University's suggestive format: cover page, acknowledgement, certificate, contents, preface, executive summary, about the agency, plan and execution, learning outcome, conclusion and attendance sheet.

# ABOUT THE AGENCY

RK NEXORA, a unit of RKNEXORA PRIVATE LIMITED, provides structured internship and skill-development programmes under the theme 'Campus to Career'. The organization focuses on academic-industry alignment, practical exposure, assessment, documentation and employability-oriented learning.

| Particulars | Details |
|---|---|
| **Name of Agency** | RKNEXORA PRIVATE LIMITED |
| **Programme / Unit** | RK NEXORA - Campus to Career |
| **Registered Office** | C/O Mukesh Kumar, Khiri, PS Atri, Jethiyan, Atri, Gaya - 805236, Bihar, India |
| **CIN** | U85499BR2026PTC086757 |
| **Email** | rknexorapvtltd@gmail.com |
| **Website** | www.rknexora.org |
| **Internship Topic** | Banking Operations |

### 1. Vision

To support students in developing practical, professional and industry-relevant capabilities.

### 2. Mission

To deliver structured learning experiences that connect academic knowledge with workplace expectations.

### 3. Activities of the Agency

1. Structured internship programmes aligned with university and higher-education requirements.
2. Skill-development learning modules, practical activities and assignments.
3. Attendance tracking, supervision, assessment and documentation.
4. Employability-oriented guidance connecting campus learning to career readiness.

### 4. Programme Structure

The internship programme is organised around a fixed number of learning hours, completed over a defined period. Each intern is registered on the internship portal with a unique registration number, is assigned a supervisor, follows a day-wise plan and maintains an attendance log. Learning is organised into three phases: **Orientation** (Days 1-2), **Learning and Practice** (Days 3-22, ten sub-topics of two days each: one concept day and one hands-on day) and **Project and Review** (Days 23-28), followed by a concluding review.

### 5. Role of the Supervisor

The internship supervisor assigned by the agency guided the student through the programme, explained concepts, assigned practice tasks, reviewed the daily log and gave feedback. The supervisor also verified attendance and reviewed the student's work at the end of the programme.

# PLAN AND EXECUTION

## 1. Objectives

The internship was planned around the following objectives, each linked to a part of the programme:

1. Understand Banking Operations - structure of banking, types of banks, the role of the RBI and banking services (Week 1).
2. Learn account opening and KYC - account types, application forms, KYC documents and verification (Week 1).
3. Learn deposits and withdrawals, loans and the credit process, and digital banking and UPI (Week 2).
4. Learn cheque and clearing, banking regulations and fraud awareness (Week 3).
5. Learn customer grievance handling and core banking systems (Week 4).
6. Develop professional discipline - accuracy, confidentiality, courtesy, documentation and report writing (throughout).

## 2. Methodology

The programme followed a blended method made up of four connected steps, repeated for each topic:

**Learn.** Each topic began with a concept session in which the supervisor explained the purpose of the function, its main documents and how it connects with other branch activities. Notes were prepared in the student's own words.

**Practise.** The concepts were then applied in guided hands-on tasks - checking sample KYC documents, filling sample account opening forms, preparing deposit and withdrawal slips, doing cash balancing exercises, calculating interest and EMI, verifying sample cheques, drawing complaint escalation charts and reading sample CBS reports. Only sample or dummy data and fictitious names were used, so that no real customer information was handled.

**Document.** Every day's work was recorded in the internship attendance log with a short remark, and sheets and checklists were saved so that the work could be reviewed.

**Review.** The supervisor reviewed the work, pointed out errors and suggested improvements. Review days, a case study and a mock practical exercise helped to consolidate the learning.

## 3. Understanding Banking Operations - Concepts Studied

**3.1 What is a bank and what do banking operations cover.** A bank is an institution that accepts deposits from the public, repayable on demand or after a period, and uses these funds to lend and invest. Banking operations are the routine activities that serve customers and keep the bank's records correct: account opening, cash and cheque handling, loans, remittances, digital services, compliance and customer service. A bank earns mainly from the difference between the interest it charges on loans and the interest it pays on deposits, along with fees and commissions.

**3.2 Structure of the banking system.** The Reserve Bank of India (RBI), set up under the RBI Act, 1934, is the central bank. Banks are regulated mainly under the Banking Regulation Act, 1949. The main types of banks are shown below.

| Type of bank | Main features |
|---|---|
| **Public sector banks** | Majority owned by the Government of India; wide branch network (for example SBI) |
| **Private sector banks** | Majority owned by private shareholders; strong use of technology |
| **Foreign banks** | Banks headquartered abroad operating branches in India |

| Type of bank | Main features |
|---|---|
| **Regional Rural Banks (RRBs)** | Serve rural and semi-urban areas, jointly owned by Centre, State and a sponsor bank |
| **Small finance and payments banks** | Serve small borrowers and savers (small finance); accept small deposits and offer payments (payments banks) |
| **Co-operative banks** | Urban co-operative banks, State and District Central co-operative banks and primary agricultural credit societies |
| **Development financial institutions** | Institutions such as NABARD and SIDBI that support agriculture and small industry |

**Functions of the RBI.** The RBI issues currency, conducts monetary policy (for example through the repo rate and reserve requirements such as CRR and SLR), acts as banker to the Government and to banks, regulates and supervises banks, manages foreign exchange and oversees payment systems. Banks also follow capital adequacy norms (Basel norms) so that they hold enough capital against their risks.

**3.3 Account opening and KYC.** Common account types are savings, current, fixed deposit (term deposit), recurring deposit and zero-balance accounts such as Basic Savings Bank Deposit Accounts and Pradhan Mantri Jan Dhan Yojana accounts. Know Your Customer (KYC) is the process of verifying a customer's identity and address before opening an account and of keeping this information updated. It follows the RBI's Master Direction on KYC, 2016, issued under the Prevention of Money Laundering Act, 2002 (PMLA), to prevent money laundering and fraud. Identity and address are proved through Officially Valid Documents such as the passport, driving licence, voter ID card, Aadhaar and NREGA job card, together with PAN or Form 60. Banks may also use video-based KYC and the Central KYC Records Registry (CKYCR). The usual steps are: customer enquiry, account opening form, KYC documents with photograph, verification against originals, specimen signature, nomination, initial deposit, account number, passbook or cheque book and debit card issue. Customers are risk-categorised (low, medium or high) and KYC is updated periodically.

**3.4 Deposits and withdrawals.** A customer deposits cash or cheques using a pay-in slip, and withdraws money using a withdrawal slip or cheque, at the counter or through ATMs. The cashier checks the slip, signature and balance, counts the cash, checks for counterfeit notes, posts the entry and returns the counterfoil or updates the passbook. PAN is required for cash deposits or withdrawals of Rs. 50,000 or more in a day, and banks report large cash transactions to the Financial Intelligence Unit (FIU-IND) as required by PMLA rules. At the end of the day the cashier balances cash: opening cash plus receipts minus payments must equal the physical cash counted. Interest on a savings account is calculated on the daily balance and credited periodically.

**3.5 Loans and the credit process.** Banks lend through personal, home, vehicle, education, gold, business (MSME), agricultural and Kisan Credit Card loans, and schemes such as PM MUDRA Yojana (Shishu, Kishore and Tarun categories). The credit process is: application, collection of documents (KYC, income proof, bank statements, property or collateral papers), verification and appraisal, sanction letter, documentation and creation of security, disbursement, and monitoring and recovery. Appraisal looks at the five Cs: Character, Capacity, Capital, Collateral and Conditions. A credit score from a credit bureau (for example the CIBIL score, ranging from 300 to 900) shows past repayment behaviour. The loan is repaid in Equated Monthly Instalments (EMI) of principal plus interest. A loan becomes a Non-Performing Asset (NPA) when interest or instalment remains overdue for more than 90 days; banks recover secured loans under laws such as the SARFAESI Act, 2002.

**3.6 Digital banking and UPI.** Digital banking includes net banking, mobile banking, debit and credit cards and electronic payments such as NEFT, RTGS and IMPS. NEFT and RTGS now work round the clock, with RTGS meant for large-value payments (minimum Rs. 2 lakh). The Unified Payments Interface (UPI), run by the National Payments Corporation of India (NPCI), allows instant bank-to-bank transfers 24 x 7 using a virtual payment address, mobile number or QR code and the customer's UPI PIN. Other digital services include the

Aadhaar Enabled Payment System (AePS) and Bharat Bill Payment System (BBPS). Safe use needs strong habits: never share the PIN, OTP, CVV or password with anyone, use only official apps, check the payee name before paying, and remember that a UPI PIN is needed only to send money, not to receive it. Under RBI rules, a customer's liability for an unauthorised electronic transaction caused by a third-party breach is zero if reported within three working days.

**3.7 Cheque and clearing.** A cheque is a written order to a bank to pay a stated sum to the payee, and is a negotiable instrument under the Negotiable Instruments Act, 1881. A cheque carries the payee name, date, amount in words and figures, drawer's signature and the MICR band at the bottom. Types include bearer, order and crossed cheques; a cheque crossed with 'Account Payee' can be paid only into the payee's account. A cheque is valid for three months from its date; an older cheque is stale, and a post-dated cheque cannot be paid before its date. Most cheques are cleared through the image-based Cheque Truncation System (CTS), in which the image and data travel rather than the paper. Banks verify date, amount, signature, endorsement, balance and alterations. Common return reasons are insufficient funds, signature differs, account closed, stale cheque, post-dated cheque, payment stopped by the drawer and alteration not authenticated. A return memo states the reason. Dishonour for insufficient funds can lead to action under Section 138 of the Negotiable Instruments Act. For high-value cheques, the Positive Pay System asks the customer to confirm cheque details beforehand.

**3.8 Banking regulations (RBI) and customer protection.** The key laws and directions are the RBI Act, 1934, the Banking Regulation Act, 1949, the Negotiable Instruments Act, 1881, the Payment and Settlement Systems Act, 2007, the PMLA, 2002 and the KYC Master Direction. Customer protection measures include the RBI's Charter of Customer Rights (fair treatment, transparency, suitability, privacy and grievance redress), the Fair Practices Code for lenders, and deposit insurance by the Deposit Insurance and Credit Guarantee Corporation (DICGC), which insures deposits up to Rs. 5 lakh per depositor per bank. Banks must keep customer information confidential, display charges and interest rates and follow RBI turnaround-time rules for failed transactions.

**3.9 Fraud awareness.** Common frauds are phishing (fake emails or links), vishing (fake calls), smishing (fake SMS), SIM swap, card skimming, fake UPI collect requests and QR codes, fake customer-care numbers, fake loan or KYC-update messages, and lottery or job scams. Warning signs are urgency or threats, requests for OTP, PIN or CVV, unknown links and offers that look too good to be true. Prevention includes never sharing credentials, using official apps and websites, setting transaction alerts, changing passwords regularly, and blocking the card or account immediately on any suspicion. Cyber fraud should be reported at once on the National Cyber Crime Helpline 1930 and the portal cybercrime.gov.in, and also to the bank. Inside the bank, fraud is reduced by the maker-checker system, dual custody of cash and keys, proper KYC and regular audit.

**3.10 Customer grievance handling.** Customers can raise complaints at the branch, through the bank's helpline, email, app or website, and the Nodal Officer. Complaints are recorded with a reference number and resolved within the bank's stated time; if the customer is not satisfied, the matter goes to the Principal Nodal Officer. A customer can also approach the RBI Ombudsman under the RBI Integrated Ombudsman Scheme, 2021 through the RBI's online complaint portal (cms.rbi.org.in) if the bank has not replied within 30 days or the reply is unsatisfactory. Under the RBI's turnaround-time framework, if an ATM transaction fails but the account is debited, the amount must be returned within five working days, failing which the bank pays compensation of Rs. 100 per day. A good response is polite, quick, clear and recorded.

**3.11 Core banking systems (CBS).** Core Banking Solution is a centralised software and database that connects all branches, so a customer can transact at any branch. It holds the customer information file (CIF), savings and current accounts (CASA), term deposits, loans, remittances, clearing and the general ledger. Entries are made by a maker and approved by a checker before posting. At the end of each day the system runs an end-of-day process and produces reports such as the day book, cash scroll and trial balance, and the branch balances its books. Products such as Finacle, Flexcube and TCS BaNCS are widely used. Strong user IDs, passwords and audit trails protect data.

**3.12 Key performance indicators (KPIs).** Banks track simple numbers to judge performance:

| Indicator | Meaning / Formula | Why it matters |
|---|---|---|
| **CASA Ratio** | (Current + Savings deposits) / Total deposits x 100 | Shows share of low-cost deposits |
| **Credit-Deposit (CD) Ratio** | Advances / Deposits x 100 | Shows how much of deposits is lent |
| **Gross NPA Ratio** | Gross NPAs / Gross advances x 100 | Shows quality of loans |
| **Net Interest Margin (NIM)** | (Interest earned - Interest paid) / Average earning assets | Shows core profitability |
| **Transaction Turnaround Time** | Time taken to complete a service | Shows service efficiency |
| **Complaints per 1,000 accounts** | Complaints received / Accounts x 1,000 | Shows customer satisfaction |

**3.13 Ethics and limitations.** Banking runs on trust. Staff must keep customer information secret, avoid conflicts of interest, never share passwords, follow KYC and anti-money-laundering rules and report suspicious activity. Rules, rates and limits change often, so every point must be checked against current RBI circulars and bank policy. An intern observes and practises on dummy data only and does not handle real cash, real accounts or customer information.

## 4. Week-wise Plan and Execution

| Week | Days | Activities |
|---|---|---|
| **Week 1** | Days 1-6 | Orientation and foundations: company induction, introduction to banking operations, banking system overview, and account opening and KYC. |
| **Week 2** | Days 7-12 | Core services: deposits and withdrawals, loans and credit process, and digital banking and UPI, each with a concept session and a hands-on task. |
| **Week 3** | Days 13-18 | Control and safety: cheque and clearing, banking regulations (RBI) and fraud awareness. |
| **Week 4** | Days 19-24 | Service and systems: customer grievance handling, core banking systems, a case study exercise and a mock practical exercise. |
| **Week 5** | Days 25-28 | Project closure: supervisor review and feedback, internship report drafting, presentation preparation and final review. |

## 5. Week-wise Narrative

**Week 1:** The first week was devoted to orientation and foundations. After company induction, the student was introduced to banking operations and studied the structure of banking, types of banks, the role of the RBI and banking services. The week ended with a study of account opening and KYC - account types, application forms, KYC documents and verification.

**Week 2:** In the second week the study moved to deposits and withdrawals - slips, cash handling and passbook entries - followed by loans and the credit process, including loan types, eligibility, documentation, appraisal and sanction, and digital banking and UPI, covering net banking, mobile banking and secure digital payments.

**Week 3:** The third week focused on cheque types, crossing, the clearing cycle and return reasons; RBI guidelines, banking rules and customer protection norms; and common banking frauds, warning signs and prevention steps.

**Week 4:** In the fourth week the student studied customer grievance handling - complaint channels, escalation, resolution and the ombudsman scheme - and core banking systems, covering CBS functions, branch operations, transaction posting and reports. A case study exercise and a mock practical exercise were completed in this week.

**Week 5:** The last week was devoted to project closure: supervisor review and feedback, drafting of the internship report, preparation of a presentation and final review before submission.

## 6. Topic-wise Learning in Detail

### 6.1 Banking System Overview

*Concept:* Structure of banking, types of banks, the role of the RBI and banking services, with the main laws that govern banks.

*Practice carried out:* Preparing a chart of bank types and a list of RBI functions and bank services.

### 6.2 Account Opening and KYC

*Concept:* Account types, application forms, KYC documents and verification, risk categories and periodic updation.

*Practice carried out:* Filling a sample account opening form with dummy details; checking a sample set of KYC documents against a checklist.

### 6.3 Deposits and Withdrawals

*Concept:* Deposit and withdrawal slips, cash handling, counterfeit checks, passbook entries and cash balancing.

*Practice carried out:* Preparing sample pay-in and withdrawal slips; completing a sample cash balancing sheet; calculating savings interest.

### 6.4 Loans and Credit Process

*Concept:* Loan types, eligibility, documentation, appraisal and sanction, EMI and NPA.

*Practice carried out:* Listing documents for a sample home loan and personal loan; calculating a sample EMI in MS Excel.

### 6.5 Digital Banking and UPI

*Concept:* Net banking, mobile banking, UPI, cards and secure digital payments, with the basic safety rules.

*Practice carried out:* Preparing a customer safety tip sheet for UPI and net banking; tracing the steps of a sample UPI payment.

### 6.6 Cheque and Clearing, Regulations, Fraud Awareness, Grievance Handling and Core Banking

*Concept:* Cheque types, crossing, the clearing cycle and return reasons; RBI guidelines and customer protection norms; common frauds and prevention; complaint channels, escalation and the ombudsman scheme; CBS functions, transaction posting and reports.

*Practice carried out:* Verifying sample cheques against a checklist; preparing a fraud warning-sign list; drawing a complaint escalation chart; reading a sample CBS day book.

## 7. Key Laws and Customer Rights - Points Studied

**Important laws and rules (introductory awareness).**

| Law / Rule | Relevance to banking |
|---|---|
| Reserve Bank of India Act, 1934 | Role and powers of the central bank |

| Law / Rule | Relevance to banking |
|---|---|
| Banking Regulation Act, 1949 | Licensing, regulation and supervision of banks |
| PMLA, 2002 and RBI KYC Master Direction, 2016 | KYC, record keeping and reporting of suspicious or large transactions |
| Negotiable Instruments Act, 1881 | Cheques, endorsement and dishonour (Section 138) |
| Payment and Settlement Systems Act, 2007 | Regulation of payment systems such as UPI, NEFT and RTGS |
| DICGC Act, 1961 | Deposit insurance up to Rs. 5 lakh per depositor per bank |
| SARFAESI Act, 2002 | Recovery of secured loans by banks |
| Consumer Protection Act, 2019 and RBI Integrated Ombudsman Scheme, 2021 | Customer remedies and complaint redressal |
| Digital Personal Data Protection Act, 2023 | Protection of customers' personal data |

**Customer rights.** Right to fair treatment, transparency and clear information on charges, protection from mis-selling, privacy of personal data, safety of money and a fair hearing of complaints.

**Good banking practice.** Verify twice, record carefully, follow maker-checker, keep cash and keys under dual control, never share passwords and escalate doubtful transactions.

## 8. Process Flows Studied

Process mapping was used to understand how work moves through a bank branch and who is responsible at each step.

| Process | Steps |
|---|---|
| **Account Opening** | Enquiry > Account opening form > KYC documents and verification > Risk category > Initial deposit > Account number > Passbook / cheque book / card |
| **Cash Deposit** | Pay-in slip > Cash counting and check > Entry in CBS (maker) > Authorisation (checker) > Counterfoil / passbook update |
| **Cash Withdrawal** | Withdrawal slip / cheque > Signature and balance check > Token and payment > Entry posted > Cash balancing |
| **Loan Process** | Application > Documents > Appraisal > Sanction > Documentation and security > Disbursement > Monitoring and recovery |
| **Cheque Clearing** | Cheque presented > Scanned image sent (CTS) > Drawee bank verifies > Paid or returned with reason > Account credited / debited |
| **Customer Complaint** | Complaint received > Reference number > Investigation > Resolution within time > Escalation if needed > Closure and feedback |

## 9. Worked Examples with Sample (Dummy) Data

**Example A: KYC document check (dummy case).** Sample customer Ms. A (fictitious) applies for a savings account. Identity proof: Aadhaar card; address proof: voter ID card; PAN card provided; two photographs; specimen signature taken. The officer checks the photograph and name against the originals, notes that the address matches, marks the customer as low risk and records the CKYC details.

**Example B: Savings interest (dummy figures).** A savings account keeps a balance of Rs. 25,000 for 90 days. At an assumed rate of 3% a year, interest = 25,000 x 3 / 100 x 90 / 365 = about Rs. 184.93.

**Example C: Fixed deposit maturity (dummy figures).** Rs. 50,000 is deposited for one year at an assumed 7% a year compounded quarterly. Maturity amount = 50,000 x (1 + 0.07 / 4) ^ 4 = about Rs. 53,593, so interest is about Rs. 3,593.

**Example D: EMI calculation (dummy figures).** A loan of Rs. 5,00,000 for 5 years at an assumed 10% a year. Monthly rate r = 10 / 12 / 100 = 0.008333 and n = 60 months. EMI = P x r x (1 + r)^n / ((1 + r)^n - 1) = about Rs. 10,624. Total paid = 10,624 x 60 = about Rs. 6,37,440, so total interest is about Rs. 1,37,440.

**Example E: CASA ratio (dummy figures).** A branch has current deposits of Rs. 20 crore, savings deposits of Rs. 40 crore and term deposits of Rs. 40 crore. Total deposits = Rs. 100 crore. CASA ratio = (20 + 40) / 100 x 100 = 60%.

**Example F: Cash balancing at day end (dummy figures).**

| Item | Basis | Amount (Rs.) |
|---|---|---|
| Opening cash balance | From previous day | 2,00,000 |
| Add: Cash received (deposits) | Pay-in slips | 3,50,000 |
| Less: Cash paid (withdrawals) | Withdrawal slips and cheques | 2,80,000 |
| Closing cash balance (book) | 2,00,000 + 3,50,000 - 2,80,000 | 2,70,000 |
| Physical cash counted | Denomination count | 2,70,000 |
| Difference | Book minus physical | 0 (cash tallies) |

**Example G: Cheque verification (dummy case).** A cheque is presented on 15 January for Rs. 12,000 but is dated 10 September of the previous year. Since more than three months have passed, it is a stale cheque and is returned with the reason 'Cheque is out of date'. Another cheque shows 'Rs. 8,500' in figures but 'Rs. eight thousand five hundred only' in words with a visible overwriting; it is returned for 'alteration requires drawer's authentication'.

## 10. Project: Banking Operations & Customer Services Study

**Scope.** The internship work was organised around a project in which account opening, KYC, loans and digital banking processes were studied with hands-on documentation practice, using sample forms and dummy data.

**Steps followed.** (i) Studied the banking system and branch services; (ii) filled sample account opening forms and checked KYC documents; (iii) prepared sample deposit and withdrawal slips and a cash balancing sheet; (iv) listed documents and calculated EMI for sample loans; (v) prepared a digital banking safety sheet and a complaint escalation chart; (vi) reviewed the work with the supervisor.

**Skills and tools.** KYC Process, Deposits & Loans, Digital Banking & UPI, RBI Regulations, Core Banking Basics, MS Excel.

**Outputs.** Completed sample forms and checklists, cash balancing sheet, interest and EMI calculation workbook, digital safety sheet, escalation chart, and this internship report.

## 11. Case Study Exercise: A UPI Fraud Complaint

A case study exercise was completed on a typical banking problem. The customer and figures are illustrative and not taken from any real person or bank.

| Part | Details |
|---|---|
| **Background** | A customer (fictitious) received a call from a person claiming to be from a bank's customer care, saying a refund of Rs. 5,000 was due. The caller asked the customer to approve a request on the UPI app and enter the UPI PIN. |
| **Problem observed** | The customer entered the PIN on a collect request and Rs. 25,000 was debited from the account. The customer came to the branch the next day to complain. |
| **Analysis** | This is a vishing and fake collect-request fraud. The customer shared the PIN willingly under pressure, so the case is not a bank-side breach. Quick action can still help, because reporting within the first hours gives the best chance to stop or trace the money. |
| **Action steps** | (1) Calm the customer and note the facts, time and transaction ID. (2) Block the UPI / account access if needed. (3) Report on the National Cyber Crime Helpline 1930 and cybercrime.gov.in. (4) Record the complaint with a reference number and send it to the Nodal Officer. (5) Advise the customer about filing a police complaint. (6) Follow up and inform the customer of the status. |
| **Prevention advice** | Never share OTP or PIN; a PIN is never needed to receive money; ignore calls offering refunds; use only official customer care numbers; set transaction alerts; review the 'pending requests' list before approving. |
| **Lesson learned** | Customer awareness is the best defence, and a fast, well-recorded response by the branch can reduce loss and build trust. |

## 12. Mock Practical Exercise: A New Customer at the Branch

In the mock practical exercise the student followed a sample (dummy) customer through the main steps of a branch day, using the forms and sheets practised earlier.

| Step | Task | Document prepared / checked | Area |
|---|---|---|---|
| 1 | Account opening | Account opening form, KYC documents verified, risk category marked | New accounts |
| 2 | First deposit | Pay-in slip filled; cash counted; passbook entry made | Cash counter |
| 3 | Withdrawal | Withdrawal slip checked for signature and balance; cash balancing noted | Cash counter |
| 4 | Cheque handling | A sample cheque verified; one cheque returned with reason and return memo | Clearing |
| 5 | Digital banking | UPI and net banking activation steps and safety tips explained | Digital banking |
| 6 | Loan enquiry | Eligibility and document checklist prepared; EMI calculated | Loans |
| 7 | Complaint | A sample complaint recorded with reference number and escalation | Customer service |
| 8 | Day end | Cash tallied; CBS day book and cash scroll checked | Back office |

The exercise showed that every step depends on the one before it: wrong KYC details at account opening can cause problems in deposits, loans, cheques and digital payments later.

## 13. Sample Checklists Prepared

Checklists were prepared as part of the hands-on tasks. They reduce errors and make routine work easier to review.

| Account Opening & KYC Checklist | Cheque Verification Checklist |
|---|---|
| Account opening form complete and signed | Cheque date valid (not stale or post-dated) |
| Identity proof (OVD) verified with original | Payee name and crossing checked |
| Address proof verified | Amount in words and figures match |
| PAN or Form 60 obtained | Drawer's signature matches specimen |
| Photographs and specimen signature taken | No overwriting or unauthenticated alteration |
| Nomination recorded | Sufficient balance and account active |
| Risk category marked; initial deposit received | Endorsement and stop-payment instructions checked |

| Loan Documentation Checklist | Cash Counter Day-end Checklist |
|---|---|
| Loan application form signed | All slips and cheques entered in CBS |
| KYC and passport-size photographs | Cash scroll and day book printed |
| Income proof and bank statements | Cash counted by denomination |
| Credit score report checked | Book balance matches physical cash |
| Collateral or property documents (if any) | Counterfeit and mutilated notes recorded |
| Appraisal note and sanction letter | Cash and keys kept under dual custody |
| Agreement and security documents signed | Differences, if any, reported to the officer |

## 14. Tools and Resources

Learning materials, sample account opening forms, slips and cheques, RBI circulars and KYC reference material, demo screens of net banking, mobile banking and UPI, sample CBS reports, MS Excel for interest, EMI and ratio calculations, MS Word and PowerPoint for documentation and presentation, assignments and mentor feedback were used during the internship.

## 15. Programme at a Glance

| Particulars | Details |
|---|---|
| **Domain** | Banking Operations |
| **Agency** | RKNEXORA PRIVATE LIMITED |
| **Minimum hours required** | 120 |
| **Learning days planned** | 28 |
| **Phases** | Orientation (Days 1-2); Learning and Practice (Days 3-22); Project and Review (Days 23-28) |
| **Record of attendance** | Internship Attendance Log, signed by the supervisor (see Attendance Sheet) |

# LEARNING OUTCOME

## a. Knowledge Acquired

1. Structure of the banking system, types of banks, the functions of the RBI and the services a bank offers.
2. Account types, the KYC process and the Officially Valid Documents used for verification.
3. Handling of deposits and withdrawals, cash balancing, passbook entries and interest calculation.
4. The loan and credit process, appraisal, EMI calculation and the meaning of NPA.
5. Digital banking and UPI, safe payment habits and the basics of cheque clearing and return reasons.
6. Key banking regulations, customer rights, fraud types and prevention, complaint channels and the RBI ombudsman scheme.
7. Functions of a core banking system, maker-checker control and basic banking ratios such as CASA and CD ratio.

### Glossary of Terms Learned

| Term | Meaning |
|---|---|
| **RBI** | Reserve Bank of India - the central bank of the country |
| **KYC** | Know Your Customer - verification of identity and address of a customer |
| **OVD** | Officially Valid Document accepted for KYC |
| **CKYCR** | Central KYC Records Registry - shared database of KYC records |
| **CASA** | Current Account and Savings Account deposits |
| **CRR / SLR** | Cash Reserve Ratio / Statutory Liquidity Ratio - reserves banks must keep |
| **EMI** | Equated Monthly Instalment - fixed monthly loan repayment |
| **NPA** | Non-Performing Asset - loan overdue for more than 90 days |
| **Collateral** | Asset pledged to secure a loan |
| **UPI** | Unified Payments Interface - instant mobile payment system |
| **NEFT / RTGS / IMPS** | Electronic fund transfer systems for different amounts and speeds |
| **MICR** | Magnetic Ink Character Recognition - code line on a cheque |
| **CTS** | Cheque Truncation System - image-based cheque clearing |
| **Crossed cheque** | Cheque payable only through a bank account, not in cash |
| **Stale cheque** | Cheque presented after three months from its date |
| **Phishing / Vishing** | Fraud through fake links or emails / fake phone calls |
| **Ombudsman** | Authority that resolves customer complaints against banks |
| **CBS** | Core Banking Solution - centralised banking software |
| **Maker-checker** | Control where one person enters and another authorises a transaction |

## b. Skills Learned

| Technical Skills | Professional Skills |
|---|---|
| KYC document checking and account opening forms | Customer service and communication |
| Deposit and withdrawal slips and cash balancing | Accuracy and attention to detail |
| Interest, FD and EMI calculation in MS Excel | Confidentiality and ethical conduct |
| Cheque verification and return reasons | Time management and teamwork |
| Digital banking safety and fraud identification | Calm complaint handling and empathy |
| Reading basic CBS reports | Documentation, report writing and presentation |

These skills were developed through repeated practice and daily documentation. Checking documents improved accuracy, cash balancing improved discipline with numbers, role-play improved confidence with customers, and writing remarks and reports improved communication.

## c. Observed Attitude and Gained Values

1. Integrity and honesty: every entry and record must be true and complete.
2. Confidentiality: customer information and passwords must never be shared.
3. Accuracy and responsibility: a small error in a slip, signature check or entry affects a customer's money.
4. Discipline and punctuality: regular reporting at fixed timings and daily attendance records.
5. Courtesy and empathy: customers are often anxious about money and must be helped patiently.

## d. Challenges Faced

| Challenges Faced | How They Were Handled |
|---|---|
| Understanding banking terms and abbreviations such as CASA, CTS and CKYCR. | Used a glossary, RBI reference material and mentor guidance. |
| Calculating interest and EMI correctly. | Used MS Excel formulas and checked results with the supervisor. |
| Remembering KYC document rules and cheque return reasons. | Prepared checklists and tables and revised them regularly. |
| Understanding how digital frauds happen. | Studied sample cases and prepared a warning-sign and prevention sheet. |
| Maintaining consistent documentation. | Used daily log entries and reviewed feedback to improve documentation progressively. |
| Managing time between practice, documentation and report writing. | Divided work week by week and used review days for corrections. |

## e. Career Pathways

The knowledge gained supports further study and careers such as Bank Clerk or Probationary Officer (through exams conducted by IBPS, SBI and other banks), Customer Service Executive, KYC and Operations Executive, Loan or Credit Officer, Relationship Executive, Business Correspondent, Fintech and Digital Payments Operations Executive, and Insurance or Mutual Fund Distribution Executive. Related higher-study options include MBA in Finance or Banking, and professional courses such as JAIIB and CAIIB offered by the Indian Institute of Banking and Finance. Growth of digital payments, financial inclusion and new banking channels keeps increasing the need for trained people.

# CONCLUSION

The internship in Banking Operations was a valuable learning experience that integrated academic knowledge with practical activity. The programme achieved its objectives through structured learning, guided practice, assignments, supervisor review and documentation.

The student gained a clear understanding of how a bank branch works - through account opening and KYC, deposits and withdrawals, loans, digital banking and UPI, cheque clearing, regulations, fraud prevention, grievance handling and core banking systems - and acquired practical familiarity with forms, slips, calculations, checklists and reports. The experience has strengthened the student's employability and provides a foundation for further study and work in banking and finance.

### Reflection

Looking back, the most useful lesson of the internship was that banking is built on trust, and trust is built on small things done correctly every day: verifying identity, checking a signature, recording an entry and keeping a customer's information safe. Moving from concept to practice to documentation made abstract ideas concrete, and supervisor feedback showed where understanding was weak. The habit of recording each day's work also made it easier to see progress over the weeks.

### Objectives and Achievement

| Objective | How it was achieved |
|---|---|
| **Understand the banking system** | Concept sessions, chart of bank types and RBI functions, glossary of terms |
| **Learn account opening, KYC, deposits and withdrawals** | Sample forms, KYC checks, slips and cash balancing sheet |
| **Understand loans, cheques and digital banking** | EMI calculation, cheque verification and UPI safety sheet |
| **Understand regulations and fraud awareness** | Study of RBI rules, fraud warning-sign list and case study |
| **Learn grievance handling and core banking** | Escalation chart, complaint exercise and CBS report reading |
| **Develop professional discipline** | Daily attendance, supervisor review and report writing |

### Future Scope

The knowledge gained can support further study of banking and finance, and careers in public and private sector banks, co-operative and rural banks, fintech companies and financial services firms. With growing digital payments and financial inclusion, trained banking professionals are increasingly needed.

### Suggestions for Improvement of the Programme

1. Include branch visits and talks by bank officers, with appropriate permissions.
2. Continue regular mentor feedback and progress reviews.
3. Provide more project-based activities such as preparing a complete mock loan file.
4. Encourage students to maintain detailed daily documentation.
