ACKNOWLEDGEMENT

I express my sincere gratitude to RK NEXORA, RKNEXORA PRIVATE LIMITED, _____ (College Name), my faculty mentors and the internship supervisor, _____, for their guidance and support. The structured activities, learning resources and regular feedback helped me complete this internship in Business Management successfully.

I am thankful to the Head of the Department and the college mentor for their encouragement and for guiding me in preparing this report. I am also grateful to the management of RKNEXORA PRIVATE LIMITED for providing a professional learning environment and the opportunity to learn and apply my knowledge in a practical setting. The concept sessions, hands-on tasks with sample business cases and templates, and the supervisor's patient and detailed feedback helped me understand how businesses are planned, organised, financed and led behind the scenes.

Finally, I thank my family and peers for their constant encouragement throughout the programme.

PREFACE

Internships are an important part of the undergraduate programme, as they allow students to see how classroom learning is applied in real organisations. The Four-Year Undergraduate Programme (FYUGP), introduced in line with the National Education Policy 2020, gives special importance to experiential learning, skill development and employability. This report has been prepared as part of the internship requirement of Magadh University and the Higher Education guidelines applicable in Bihar.

The report describes the internship undertaken in Business Management at RKNEXORA PRIVATE LIMITED, the plan followed, the work carried out, and the learning gained. Every business, from a small coaching centre or grocery shop in Gaya to a large company, needs people who can plan, organise, direct and control its work. Someone must decide the goals, design the structure, understand customers, manage money, run daily operations, look after people, choose a strategy and take sound decisions. Business Management is the set of ideas and methods that make this possible: management principles, organisational structure, marketing, finance, operations, human resources, strategy, SWOT analysis, decision making and case analysis. This internship offered a first-hand introduction to how these areas work together.

The report has been arranged in the order suggested by the University, beginning with the cover page and acknowledgement and ending with the conclusion and attendance sheet. It is hoped that the report gives a clear and honest account of the internship experience. All examples in it use dummy data and fictitious organisations; no real business or customer information was handled and no confidential document was used.

EXECUTIVE SUMMARY

This report documents the internship completed in Business Management at RKNEXORA PRIVATE LIMITED (RK NEXORA - 'Campus to Career'). The programme required a minimum of 120 hours, completed over about four to five weeks (28 working days) with daily sessions of four to five hours, and was supported by an attendance log, supervisor guidance and review.

Background. Business Management means planning, organising, leading and controlling the resources of a business - people, money, materials and time - so that its goals are achieved efficiently. Its great strength is that it gives a method for taking decisions, and its results can be measured through sales, cost, profit, customer satisfaction and growth. A good manager therefore combines clear thinking and communication with numbers and ethics. The work covers understanding management principles, designing the organisational structure, applying marketing and financial basics, running operations, handling people, forming a strategy, analysing strengths and weaknesses, taking decisions and learning from cases. For a student from any discipline, the internship shows how economics, psychology, accounting, communication and law come together in a real management job.

Objectives. The internship aimed to (i) build a structured understanding of management principles and organisational structure, (ii) learn the basics of marketing, finance, operations and HR, (iii) learn business strategy, SWOT analysis and decision making, (iv) learn how to analyse a business case and give recommendations, (v) complete a case study and strategy project, and (vi) develop communication, documentation and professional discipline.

Work carried out. The student first studied the fundamentals of Business Management, then worked through management principles, organisational structure, marketing basics, financial basics, operations basics, HR basics, business strategy, SWOT analysis, decision making and case study analysis. Each topic had a concept session followed by a hands-on task using free tools, sample business cases and dummy data. The later part of the programme was devoted to a case study, a mock practical exercise, supervisor review and preparation of this report.

Project. The work was tied together in a project titled *Business Case Study & Strategy Project*, in which a fictitious business was analysed, its strengths, weaknesses, opportunities and threats were identified, a strategy and an action plan were proposed and a recommendation report was prepared.

Method. A blended method was followed - learn, practise, document and review - supported by a daily attendance log with day-wise remarks and regular feedback from the supervisor.

Learning gained. The student gained a clear understanding of how a business is planned, organised and controlled, practical familiarity with planning and goal setting, organisation charts, the marketing mix, simple budgets, profit and break-even calculations, capacity and quality measures, SWOT analysis, weighted decision matrices and case analysis in MS Excel and Word, awareness of business ethics and legal rules, and improved communication, analytical thinking and professional discipline.

Key observations. Management works best when goals are clear and measurable; structure must support strategy and not the other way round; customers and cash are the two things a business cannot ignore; decisions are better when options are compared on stated criteria; and a recommendation is useful only when it is supported by evidence and numbers.

Conclusion. The internship met its objectives and contributed to the student's academic understanding, employability and confidence. The report follows the University's suggestive format: cover page, acknowledgement, certificate, contents, preface, executive summary, about the agency, plan and execution, learning outcome, conclusion and attendance sheet.

ABOUT THE AGENCY

RK NEXORA, a unit of RKNEXORA PRIVATE LIMITED, provides structured internship and skill-development programmes under the theme 'Campus to Career'. The organization focuses on academic-industry alignment, practical exposure, assessment, documentation and employability-oriented learning.

Particulars	Details
Name of Agency	RKNEXORA PRIVATE LIMITED
Programme / Unit	RK NEXORA - Campus to Career
Registered Office	C/O Mukesh Kumar, Khiri, PS Atri, Jethiyan, Atri, Gaya - 805236, Bihar, India
CIN	U85499BR2026PTC086757
Email	rknexorapvtltd@gmail.com
Website	www.rknexora.org
Internship Topic	Business Management

1. Vision

To support students in developing practical, professional and industry-relevant capabilities.

2. Mission

To deliver structured learning experiences that connect academic knowledge with workplace expectations.

3. Activities of the Agency

1. Structured internship programmes aligned with university and higher-education requirements.
2. Skill-development learning modules, practical activities and assignments.
3. Attendance tracking, supervision, assessment and documentation.
4. Employability-oriented guidance connecting campus learning to career readiness.

4. Programme Structure

The internship programme is organised around a fixed number of learning hours, completed over a defined period. Each intern is registered on the internship portal with a unique registration number, is assigned a supervisor, follows a day-wise plan and maintains an attendance log. Learning is organised into three phases: **Orientation** (Days 1-2), **Learning and Practice** (Days 3-22, ten sub-topics of two days each: one concept day and one hands-on day) and **Project and Review** (Days 23-28), followed by a concluding review.

5. Role of the Supervisor

The internship supervisor assigned by the agency guided the student through the programme, explained concepts, assigned practice tasks, reviewed the daily log and gave feedback. The supervisor also verified attendance and reviewed the student's work at the end of the programme.

PLAN AND EXECUTION

1. Objectives

The internship was planned around the following objectives, each linked to a part of the programme:

1. Understand management principles - planning, organising, directing and controlling (Week 1).
2. Learn organisational structure - types of structure, hierarchy and authority (Week 1).
3. Learn marketing basics - the 4Ps, segmentation and customer needs (Week 2).
4. Learn financial basics - accounts, budgets, profit and cash flow (Week 2).
5. Learn operations basics - production, inventory, quality and delivery (Week 2).
6. Learn HR basics, business strategy and SWOT analysis - recruitment, training, appraisal and employee relations; vision, goals and competitive advantage; strengths, weaknesses, opportunities and threats (Week 3).
7. Learn decision making and case study analysis, and complete the project (Week 4).
8. Develop professional discipline - communication, honesty, documentation and report writing (throughout).

2. Methodology

The programme followed a blended method made up of four connected steps, repeated for each topic:

Learn. Each topic began with a concept session in which the supervisor explained the purpose of the topic, its main terms and how it connects with the other parts of Business Management. Notes were prepared in the student's own words.

Practise. The concepts were then applied in guided hands-on tasks - writing SMART goals and a plan, drawing an organisation chart, preparing a marketing mix and a customer profile, making a simple budget and profit statement in MS Excel, mapping a process and measuring capacity, drafting a recruitment and training plan, writing a vision and strategy, preparing a SWOT analysis, comparing options in a decision matrix and analysing a business case. Only fictitious organisations, sample cases and dummy figures were used. Only fictitious organisations, sample documents and dummy data were used, so that no real personal or confidential information was handled.

Document. Every day's work was recorded in the internship attendance log with a short remark, and sheets, drafts and reports were saved so that the work could be reviewed.

Review. The supervisor reviewed the work, pointed out errors and suggested improvements. Review days, a case study and a mock practical exercise helped to consolidate the learning.

3. Understanding Business Management - Concepts Studied

3.1 Management principles

Management is the process of getting things done through people and resources to achieve goals. Its four classic functions are *planning* (deciding what to do, when and how), *organising* (arranging people, tasks and resources), *directing* or *leading* (guiding, motivating and communicating) and *controlling* (comparing results with plans and correcting differences). Henri Fayol described fourteen principles of management, including division of work, authority and responsibility, discipline, unity of command, unity of direction, remuneration, order, equity, initiative and team spirit, and F. W. Taylor's scientific management stressed studying work to improve efficiency.

Managers work at three levels: top management sets direction, middle management turns plans into action, and first-line managers supervise daily work. Managerial skills are technical, human and conceptual, with

human skills needed at every level. Good planning uses SMART goals - specific, measurable, achievable, relevant and time-bound - and management by objectives links the goals of the organisation to those of each person. Modern management also stresses ethics, social responsibility and the use of data in decisions.

3.2 Organisational structure

Organisational structure shows how tasks are divided, who reports to whom and how decisions are made. Common types are the *functional* structure (departments such as marketing, finance and operations), the *divisional* structure (by product, region or customer), the *matrix* structure (two reporting lines) and the *flat* structure with few levels. A small business often uses a simple structure in which the owner decides most things, while a large business needs formal departments and rules.

Key ideas are hierarchy (levels of authority), *span of control* (the number of people reporting to one manager), line and staff authority, delegation (giving a task together with the authority to do it), centralisation and decentralisation, and formal and informal organisation. An organisation chart makes the structure visible. A good structure has clear roles, avoids two bosses for one person, balances authority with responsibility and changes when the strategy changes.

3.3 Marketing basics

Marketing is the process of understanding customer needs and delivering value so that customers buy and keep buying. It differs from selling, which starts with the product, because marketing starts with the customer. The traditional *marketing mix* has four Ps: *product* (what is offered, its quality and features), *price* (the amount charged, which must cover cost and match perceived value), *place* (where and how the product reaches the customer) and *promotion* (advertising, personal selling, offers and publicity). For services, three more Ps are added: people, process and physical evidence.

Marketing starts with *segmentation* (dividing the market into groups with similar needs), *targeting* (choosing the groups to serve) and *positioning* (the place the brand takes in the customer's mind), often called STP. Customer needs are studied through surveys, conversations and observation, and the customer journey runs from awareness to purchase and loyalty. Digital channels such as search, social media and WhatsApp are important for local businesses, but advertising claims must be honest. Satisfied customers are cheaper to keep than new customers are to win.

3.4 Financial basics

Finance and accounting tell the owner whether the business is healthy. *Accounts* record transactions: every sale, purchase, expense and payment is entered in books and summarised in statements. The *income statement* shows revenue, expenses and profit for a period; the *balance sheet* shows assets, liabilities and the owner's capital at a date; and the *cash flow statement* shows cash coming in and going out. Profit and cash are different: a business can show a profit on paper and still run short of cash if customers pay late.

A *budget* is a plan of income and expenses for a future period, and comparing actual figures with the budget is a basic tool of control. Costs are divided into fixed costs (such as rent and salaries, which do not change with sales) and variable costs (such as materials, which change with sales). The *break-even point* is the sales volume at which total revenue equals total cost, and is found by dividing fixed costs by the contribution per unit (price minus variable cost per unit). Useful ratios are profit margin (profit divided by revenue) and return on investment. Taxes such as GST and income tax must be understood and paid on time, and records must be accurate and honest.

3.5 Operations basics

Operations management is concerned with turning inputs (people, materials, machines, information) into outputs (goods or services) efficiently and with good quality. Its main areas are production or service delivery, *inventory* (keeping the right stock - not too much, which locks up money, and not too little, which causes shortages), *quality* (meeting the customer's requirements), scheduling and *delivery* on time. Operations in a coaching centre are the timetable, classrooms, teachers and study material; in a shop they are purchase, stock and billing.

Important ideas are capacity (the maximum output possible) and capacity utilisation (actual output divided by capacity), process mapping (drawing each step to find delay and waste), productivity (output per unit of input), quality control and continuous improvement, and the reduction of waste through lean thinking. Inventory is controlled by methods such as setting a reorder level and keeping a safety stock. Good operations keep costs low and customers satisfied, and they depend on clear procedures, trained people and regular measurement.

3.6 HR basics

Human Resource Management is the function that looks after people in the business. Its main activities are *recruitment and selection* (finding and choosing the right people using a job description and fair interviews), *onboarding* (welcoming and orienting new joiners), *training and development* (building skills), *compensation* (fair and timely pay), *performance appraisal* (reviewing performance against goals and giving feedback) and *employee relations* (communication, grievance handling and a respectful workplace).

Motivation is central to management. Maslow's hierarchy of needs and Herzberg's two-factor theory explain that people need security and fair pay but are also motivated by recognition, achievement and growth. Good managers communicate clearly, delegate, recognise good work and treat people fairly. Organisations must also follow labour laws, keep employee records and protect personal data. High attrition is costly because every exit brings the cost of hiring and training again.

3.7 Business strategy

Strategy is the long-term plan by which a business aims to achieve its goals and win customers in competition. It begins with the *vision* (what the business wants to become), the *mission* (why it exists and whom it serves) and measurable *objectives*. Strategy formulation studies the external environment (customers, competitors, technology, laws and the economy) and the internal strengths of the business, then chooses a direction, implements it through plans and budgets, and evaluates the result.

Michael Porter described three generic strategies for *competitive advantage*: cost leadership (being the lowest-cost producer), differentiation (offering something distinctive that customers value) and focus (serving a narrow segment very well). Growth options include selling more of the present product in the present market, entering new markets, adding new products or diversifying. A small local business usually succeeds by differentiation and focus, such as personal service, quality and trust. A strategy is useful only if it is communicated, linked to action and reviewed regularly.

3.8 SWOT analysis

SWOT analysis is a simple framework for understanding the position of a business. *Strengths* and *weaknesses* are internal factors, such as skilled staff, a good reputation, limited money or weak systems. *Opportunities* and *threats* are external factors, such as growing demand, new technology, new competitors or changes in rules. The analysis is made by listing points in a four-box table, supporting each point with evidence, and ranking the most important ones.

The value of SWOT lies in using it. In a TOWS matrix the factors are combined to find actions: use strengths to take opportunities, use strengths to reduce threats, overcome weaknesses by using opportunities, and reduce weaknesses to avoid threats. Common mistakes are listing vague or opinion-based points, mixing

internal and external factors, and stopping after the list without making a plan. SWOT should be repeated regularly because circumstances change. It is often paired with PESTLE analysis of the political, economic, social, technological, legal and environmental environment.

3.9 Decision making

Decision making is the process of choosing the best course of action among alternatives. A rational process has steps: define the problem clearly; set the criteria for a good decision; collect information; generate alternatives; evaluate each against the criteria; choose; implement; and review the result. Decisions may be programmed (routine, covered by rules) or non-programmed (new and unstructured), and they are taken under certainty, risk or uncertainty.

Useful tools are the *pros and cons list*, the *weighted decision matrix* (each option is scored on weighted criteria and the weighted scores are added) and *expected monetary value*, which multiplies each possible outcome by its probability. Managers must watch for biases such as overconfidence, preferring the first option found and ignoring information that disagrees with an early view. Group decisions bring more ideas but can take longer, and every important decision should be recorded with its reasons so that it can be reviewed later.

3.10 Case study analysis

A case study is a description of a real or realistic business situation that is studied to learn lessons. Analysis follows a method: read the case carefully and note the facts; identify the main problem and separate it from symptoms; analyse causes with tools such as SWOT, the marketing mix, financial ratios and process maps; generate alternative solutions; evaluate them against criteria such as cost, time, risk and fit; recommend one with an action plan; and state the expected results and risks.

A good case report has an executive summary, background, problem statement, analysis with evidence and numbers, alternatives considered, a clear recommendation, an implementation plan with responsibilities and timeline, and a conclusion. It should be honest about limits of the data and assumptions made. Case analysis builds the habit of linking theory with practice, separating facts from opinions, and presenting a decision with its reasons in a clear and concise way.

3.11 Rules, ethics and limitations

Business managers must follow laws and ethical principles. Important laws include the Companies Act, 2013 for companies, the Limited Liability Partnership Act, 2008, the Indian Contract Act, 1872, the Sale of Goods Act, 1930, the Consumer Protection Act, 2019, the Goods and Services Tax laws, the Income-tax Act, the Information Technology Act, 2000 and the Digital Personal Data Protection Act, 2023, together with labour and environmental rules. Honest accounts, truthful advertising, fair treatment of employees, customers and suppliers, and protection of customer data are basic duties.

Good practice includes keeping accurate books, paying taxes and dues on time, avoiding misleading claims, respecting intellectual property, avoiding conflicts of interest, treating all stakeholders fairly, taking responsibility for decisions and recording the reasons for important decisions. The laws, rates and procedures mentioned in this report change often, so they must be verified against official sources, and the figures in the examples are dummy values for learning only.

4. Week-wise Plan and Execution

Week	Days	Activities
Week 1	Days 1-6	Orientation and foundations: company induction, introduction to Business Management, Management Principles and Organisational Structure.
Week 2	Days 7-12	Understand the business functions: Marketing Basics, Financial Basics and Operations Basics, each with a concept session and a hands-on task.
Week 3	Days 13-18	People, strategy and analysis: HR Basics, Business Strategy and SWOT Analysis.
Week 4	Days 19-24	Decide and apply: Decision Making, Case Study Analysis, a case study exercise and a mock practical exercise.
Week 5	Days 25-28	Project closure: supervisor review and feedback, internship report drafting, presentation preparation and final review.

5. Week-wise Narrative

Week 1: The first week was devoted to orientation and foundations. After company induction, the student was introduced to Business Management and studied Management Principles and Organisational Structure, with a concept day and a practice day for each.

Week 2: In the second week the study moved to Marketing Basics, Financial Basics and Operations Basics, each studied in a concept session and then practised on sample tasks.

Week 3: The third week focused on HR Basics, Business Strategy and SWOT Analysis.

Week 4: In the fourth week the student studied Decision Making and Case Study Analysis. A case study exercise and a mock practical exercise were also completed in this week.

Week 5: The last week was devoted to project closure: supervisor review and feedback, drafting of the internship report, preparation of a presentation and final review before submission.

6. Topic-wise Learning in Detail

6.1 Management Principles

Concept: Planning, organising, directing and controlling. **Practice carried out:** Writing SMART goals and a plan with tasks, owners and dates, and mapping the four functions of management to a sample business.

6.2 Organisational Structure

Concept: Types of structure, hierarchy and authority. **Practice carried out:** Drawing organisation charts of a small and a large business, calculating span of control and writing role descriptions.

6.3 Marketing Basics

Concept: The 4Ps, segmentation and customer needs. **Practice carried out:** Preparing a customer profile, a marketing mix note and a segmentation, targeting and positioning statement for a sample business.

6.4 Financial Basics

Concept: Accounts, budgets, profit and cash flow. **Practice carried out:** Preparing a monthly income statement, budget and cash flow in MS Excel and calculating margin and break-even for dummy figures.

6.5 Operations Basics

Concept: Production, inventory, quality and delivery. **Practice carried out:** Mapping a service process, calculating capacity and utilisation and setting stock and quality checks.

6.6 HR Basics

Concept: Recruitment, training, appraisal and employee relations. **Practice carried out:** Writing a job description, a hiring plan, a training plan and an appraisal format, and calculating attrition for sample data.

6.7 Business Strategy

Concept: Vision, goals, competitive advantage and strategy formulation. **Practice carried out:** Writing a vision, mission and objectives and choosing a generic strategy with an action plan for a sample business.

6.8 SWOT Analysis

Concept: Strengths, weaknesses, opportunities and threats. **Practice carried out:** Preparing a SWOT table with evidence and a TOWS matrix of actions for a sample business.

6.9 Decision Making

Concept: The decision process, alternatives and evaluation. **Practice carried out:** Comparing growth options with a weighted decision matrix and expected monetary value, and recording the decision with reasons.

6.10 Case Study Analysis

Concept: Analysing a business case and giving recommendations. **Practice carried out:** Analysing a sample case step by step and writing a short report with problem, analysis, alternatives and recommendations.

7. Rules, Ethics and Good Practice - Points Studied

Business management operates within a legal and ethical framework. Business records and accounts must be accurate and honest, and taxes must be paid under the applicable tax laws. Advertising claims must be true under the Consumer Protection Act, 2019. Contracts with customers, suppliers and employees must follow the Indian Contract Act, 1872 and related laws. Customer and employee data must be collected and used only with consent and for a stated purpose under the Digital Personal Data Protection Act, 2023.

Good practice includes fair dealing with customers, suppliers and employees, giving clear invoices and receipts, keeping accounts up to date, avoiding bribery and conflicts of interest, protecting confidential information, caring for the environment and the community, and being open about the limits of a plan or a forecast.

8. Process Flows Studied

Process mapping was used to understand how work in Business Management moves from start to finish and who is responsible at each step. The main flows studied were:

- **Planning cycle:** Goal setting > Environment analysis > Plan and budget > Organise people and resources > Implement > Monitor > Correct.
- **Marketing:** Market research > Segmentation > Targeting > Positioning > Marketing mix > Promotion > Sales > Feedback.
- **Finance:** Record transactions > Prepare income statement and balance sheet > Budget > Compare actual with budget > Take corrective action.
- **Operations:** Order or enrolment > Resource planning > Production or service delivery > Quality check > Delivery > Customer feedback.
- **Strategy:** Vision and mission > Environment and SWOT analysis > Strategic options > Choice > Action plan > Review.
- **Decision and case analysis:** Problem definition > Criteria > Information > Alternatives > Evaluation > Decision > Implementation > Review.

9. Worked Examples with Sample (Dummy) Data

The examples below use a fictitious local business, Gyan Jyoti Classes, a coaching centre for Class 9 and 10 in a town in Bihar, with 150 students. All names, numbers and results are dummy figures for learning.

Example A: Planning with a SMART goal

The owner set the goal 'enrol 60 new students for the Class 9 and 10 batches by 30 April'. This is specific (new enrolments in two classes), measurable (60), achievable (the centre enrolled 48 in the previous year with no promotion), relevant (it increases income) and time-bound (30 April). The plan broke the goal into tasks: advertise in schools and online (owner, from 1 March), conduct free demo classes (coordinator, every Saturday), follow up on enquiries within one day (office staff) and review weekly. Control was done by comparing the number enrolled each week with the target of about 8 students a week over the 7.5 weeks, since 60 / 7.5 = 8.

Example B: Organisation structure

The centre has a director, two academic coordinators, 12 teachers, 3 office staff and 2 support staff. Each coordinator supervises 6 teachers, so the span of control is 12 / 2 = 6. The structure is functional, with an academic side and an office side, and the director takes major decisions while the coordinators decide timetables and tests. The role of an assistant to the director was clarified as a staff position that advises and does not command, so that no teacher has two bosses.

Example C: Marketing mix

Product: classroom coaching for Class 9 and 10 with small batches, weekly tests and doubt classes. *Price:* Rs. 3,000 per student per month, set after comparing with two nearby centres charging Rs. 2,500 and Rs. 3,500. *Place:* a centre near the main school road, with online doubt support through WhatsApp. *Promotion:* school visits, pamphlets, a Google Business Profile, parent referrals and a free demo class. For segmentation the centre chose parents of Class 8 to 10 students within 5 km, and positioned itself as 'small batches, personal attention'.

Example D: Profit and break-even

In one month the centre had 150 students paying Rs. 3,000 each, so revenue = 150 × 3,000 = Rs. 4,50,000. Expenses were salaries Rs. 2,40,000, rent Rs. 60,000, utilities Rs. 15,000, marketing Rs. 15,000 and study material and tests at Rs. 200 per student = 150 × 200 = Rs. 30,000, a total of Rs. 3,60,000. Profit = 4,50,000 − 3,60,000 = Rs. 90,000 and profit margin = 90,000 / 4,50,000 = 20%. Fixed costs are 2,40,000 + 60,000 + 15,000 + 15,000 = Rs. 3,30,000. Contribution per student = 3,000 − 200 = Rs. 2,800, so break-even = 3,30,000 / 2,800 = about 117.9, that is 118 students. The margin of safety = (150 − 118) / 150 = about 21.3%. With an opening cash balance of Rs. 1,00,000, cash inflow of Rs. 4,50,000 and outflow of Rs. 3,60,000, the closing cash = Rs. 1,90,000. These figures are simplified and ignore tax.

Example E: Operations and capacity

The centre has 6 classrooms with 30 seats each and runs 1 batch per classroom in the evening, so capacity = 6 × 30 = 180 seats. With 150 students enrolled, capacity utilisation = 150 / 180 = about 83.3%. Process mapping of the admission process showed five steps (enquiry, demo class, form, fee payment, batch allotment) taking 4 days; removing a duplicate form reduced it to 3 days. For quality, the pass rate in the pre-board test was 90 of 100 students, or 90%, which became the target to maintain.

Example F: HR basics

The centre had 20 employees on average during the year and 3 left, so attrition = 3 / 20 × 100 = 15%. A recruitment plan for one new teacher followed these steps: job description, advertisement, screening of 30 CVs to 8, demo classes, selection of one candidate and a joining plan. A one-day training on doubt-solving methods was given to all teachers, and an appraisal form with four KPIs (syllabus completion, results, attendance and student feedback) was prepared for the year-end review.

Example G: Strategy

The centre's *vision* is to be the most trusted coaching centre for school students in the town. Its *mission* is to give every student personal attention and clear concepts at a fair fee. The *objective* is to reach 200 students and a 25% profit margin within two years. Using Porter's generic strategies, the centre rejected cost leadership, because a large competitor can always charge less, and chose *differentiation* (small batches, weekly tests, doubt classes and regular parent reports) combined with a *focus* on Class 9 and 10 students. An action plan with owners, dates and a budget followed.

Example H: SWOT analysis

Factor	Points (dummy)
Strengths	Experienced teachers; small batches; good results (90% pass rate); strong parent trust
Weaknesses	Dependence on a few teachers; no online presence; manual record keeping
Opportunities	Growing demand for board-exam coaching; free digital tools; parents searching online; possible Class 11 and 12 batches
Threats	A new large coaching brand nearby; free online videos; teachers leaving for other centres

The TOWS actions were: use strong results and trust (S) to take the online demand (O) by launching a Google Business Profile and online doubt support; use small batches (S) to defend against the new brand (T); reduce dependence on a few teachers (W) by training and documenting lesson plans; and move records to a spreadsheet (W) to prepare for growth.

Example I: Decision making with a weighted matrix

The centre compared three options for growth: A) open a second branch, B) start online classes, C) add Class 11 and 12 batches. The criteria and weights were cost 30%, demand 30%, risk 20% and fit with strengths 20%, with scores from 1 to 10 where a higher score is better (a low-cost or low-risk option scores high). Option A scored 5, 7, 4 and 6, so $0.3 \times 5 + 0.3 \times 7 + 0.2 \times 4 + 0.2 \times 6 = 1.5 + 2.1 + 0.8 + 1.2 = 5.6$. Option B scored 8, 6, 7 and 7, giving $2.4 + 1.8 + 1.4 + 1.4 = 7.0$. Option C scored 7, 8, 6 and 9, giving $2.1 + 2.4 + 1.2 + 1.8 = 7.5$. Option C was chosen. As a check, its expected monetary value was calculated with a 60% chance of a profit of Rs. 2,00,000 and a 40% chance of a loss of Rs. 50,000: $(0.6 \times 2{,}00{,}000) + (0.4 \times -50{,}000) = 1{,}20{,}000 - 20{,}000 =$ Rs. 1,00,000, which is positive.

10. Project: Business Case Study & Strategy Project

Scope. The internship work was organised around a project in which a fictitious business was studied, its strengths, weaknesses, opportunities and threats were analysed, a strategy and action plan were proposed, and a recommendation report was prepared, using a sample case and dummy data.

Steps followed. (i) Chose a fictitious business and described its goals and structure; (ii) analysed its marketing mix and customer segments; (iii) prepared a simple income statement, budget and break-even calculation in MS Excel; (iv) studied operations and capacity and listed HR needs; (v) wrote a vision, mission and objectives and chose a generic strategy; (vi) prepared a SWOT and TOWS analysis; (vii) compared growth options with a weighted decision matrix; (viii) wrote an action plan and recommendation report; and (ix) reviewed the work with the supervisor.

Skills and tools. Management Principles, SWOT Analysis, Strategy, MS Excel, Business Writing and Presentation.

Outputs. Business profile and organisation chart, marketing mix note, income statement and break-even sheet, operations and HR note, strategy statement, SWOT and TOWS table, decision matrix, action plan, recommendation report, presentation, and this internship report.

11. Case Study Exercise: A Shop That Expanded Too Fast

A case study exercise was completed on a typical business problem. The business and figures are illustrative and not taken from any real organisation.

Background. A popular local sweet and snacks shop (fictitious) had steady sales and a loyal customer base. Encouraged by this, the owner invested Rs. 8,00,000 of savings to open a second branch in a nearby town.

Problem observed. The owner expected sales of Rs. 2,00,000 a month at the new branch, but actual sales were only about Rs. 90,000, while monthly costs were about Rs. 1,40,000, a loss of about Rs. 50,000 every month. No market study was done: the new location had fewer customers and a strong competitor. The owner split his time between two shops, decisions waited for his approval, and quality at the original shop fell. Staff were hired in a hurry without training, there was no budget, and cash from the first shop was used to cover the losses of the second. The owner felt that expansion is simply not a good idea.

Analysis. The main problem was not expansion itself but poor planning and control. Without market research, demand was overestimated. The structure was centralised in one person, so neither shop was managed well. There was no budget or break-even analysis, so the loss was noticed late. Poor training affected quality, and mixing the cash of both shops hid the true position of each.

Recommendations. (1) Study demand, competitors and customers before any expansion, using a SWOT analysis. (2) Prepare a budget and a break-even calculation for each shop and track them monthly. (3) Appoint and train a branch manager and delegate daily decisions with clear authority. (4) Keep separate accounts and cash for each branch. (5) Standardise recipes, quality checks and training. (6) Run local promotions and test offers to build demand at the new branch. (7) Set a review date and clear criteria for continuing, changing or closing the branch.

Expected result and lesson learned. With a clear plan, delegation, separate accounts and local marketing, the losses are expected to fall and the shops to become stable. The lesson is that management is a system: planning, organising, leading and controlling must work together, and numbers and evidence must be used before and after important decisions.

12. Mock Practical Exercise: A Thirty-Day Business Plan for a Small Venture

In the mock practical exercise the student planned a thirty-day business plan for a sample (dummy) small venture, from the first goal to the final recommendation, using the tools and methods practised earlier. The steps followed were:

1. Goal and plan: wrote SMART goals, tasks, owners and timeline.
2. Structure: drew the organisation chart and defined roles.
3. Marketing: prepared the customer segments and the marketing mix.
4. Finance: prepared a budget, profit statement and break-even calculation in MS Excel.
5. Operations: mapped the main process and calculated capacity and utilisation.
6. People: wrote a job description, a hiring plan and a training plan.
7. Strategy and analysis: wrote the vision and mission, chose a strategy and prepared a SWOT and TOWS table.
8. Decision and report: compared options in a decision matrix and wrote a one-page recommendation with risks and next steps.

The exercise showed that every step depends on the one before it: unclear goals lead to a weak plan, a poor structure slows decisions, wrong prices and costs destroy profit, weak operations disappoint customers, and an honest, evidence-based recommendation is the base of the next decision.

13. Sample Checklists Prepared

Checklists were prepared as part of the hands-on tasks. They reduce errors and make routine work easier to review.

Planning and Organising Checklist

- Goals written as SMART goals.
- Tasks, owners, dates and budget assigned.
- Organisation chart prepared; one boss for each person.
- Authority matches responsibility; span of control checked.
- Progress reviewed on fixed dates.

Marketing Checklist

- Target customers and their needs described.
- Product, price, place and promotion planned together.
- Prices compared with competitors and checked against cost.
- Claims in advertising are true and can be proved.
- Customer feedback collected and used.

Finance Checklist

- All income and expenses recorded with bills or receipts.
- Budget prepared and compared with actual figures every month.
- Fixed and variable costs identified; break-even calculated.
- Cash flow forecast prepared.
- Taxes and dues listed with due dates and verified on official sources.

Operations and HR Checklist

- Process steps mapped; delays and waste identified.
- Capacity and utilisation calculated.
- Stock levels, reorder level and quality checks defined.
- Job descriptions written; hiring and training planned.
- Appraisal and feedback dates fixed.

Strategy and Decision Checklist

- Vision, mission and objectives written.
- SWOT points supported by evidence; internal and external factors separated.
- TOWS actions listed with owners.
- Options compared on stated criteria and weights.
- Risks, assumptions and review date recorded.

14. Tools and Resources

Learning materials, MS Excel and Google Sheets for budgets, break-even and decision matrices, MS Word for case reports, PowerPoint for presentation, Canva for charts and posters, sample business cases and annual-report extracts for study, official websites of government departments for rules and schemes, assignments and mentor feedback were used during the internship.

15. Programme at a Glance

The programme was in the domain of Business Management with RKNEXORA PRIVATE LIMITED as the agency. It required a minimum of 120 hours over 28 learning days, organised in three phases: Orientation (Days 1-2), Learning and Practice (Days 3-22) and Project and Review (Days 23-28). Attendance was recorded in the Internship Attendance Log, signed by the supervisor (see Attendance Sheet).

LEARNING OUTCOME

a. Knowledge Acquired

1. The four functions of management, the principles of Fayol and Taylor and the levels and skills of managers.
2. The types of organisational structure, hierarchy, span of control and delegation.
3. The marketing mix, segmentation, targeting and positioning.
4. Basic accounts, budgets, profit, cash flow and break-even analysis.
5. How operations, capacity, inventory and quality are managed.
6. How HR functions, business strategy and SWOT analysis support the business.
7. How to take decisions with a weighted matrix and expected value, and how to analyse a case and make a recommendation.

Glossary of Terms Learned

- **Management** - Planning, organising, directing and controlling resources to achieve goals.
- **SMART goal** - Specific, measurable, achievable, relevant and time-bound goal.
- **Span of control** - Number of people reporting directly to one manager.
- **Delegation** - Giving a task together with the authority to do it.
- **STP** - Segmentation, targeting and positioning.
- **Marketing mix (4Ps)** - Product, price, place and promotion.
- **Income statement** - Statement of revenue, expenses and profit for a period.
- **Balance sheet** - Statement of assets, liabilities and capital at a date.
- **Cash flow** - Movement of cash into and out of the business.
- **Fixed / Variable cost** - Cost that does not change with sales / cost that changes with sales.
- **Break-even point** - Sales at which total revenue equals total cost.
- **Profit margin** - Profit divided by revenue, as a percentage.
- **Capacity utilisation** - Actual output divided by maximum possible output.
- **Inventory / Reorder level** - Stock held / stock level at which a new order is placed.
- **Vision / Mission** - What the business wants to become / why it exists.
- **Competitive advantage** - Something that lets a business perform better than its rivals.
- **SWOT / TOWS** - Analysis of strengths, weaknesses, opportunities and threats / matrix of actions from them.
- **Decision matrix** - Table that scores options on weighted criteria.
- **EMV** - Expected monetary value: outcomes multiplied by their probabilities.
- **Case analysis** - Study of a business situation to find the problem and recommend action.

b. Skills Learned

Technical skills. Setting SMART goals and plans; drawing organisation charts; preparing a marketing mix and customer profile; preparing a budget, profit statement and break-even calculation in MS Excel; mapping processes and calculating capacity; writing job descriptions; preparing vision and strategy statements; building SWOT and TOWS tables; using decision matrices and expected value; and writing case analysis and recommendation reports.

Professional skills. Analytical and numerical thinking; clear writing and presentation; leadership and teamwork; problem solving and decision making; attention to detail; time management; ethical and legal

awareness; acceptance of feedback; and documentation and report writing.

These skills were developed through repeated practice and daily documentation. Budget and break-even work improved numerical thinking, SWOT and decision matrices improved structured thinking, writing recommendations improved clarity, and writing remarks and reports improved communication.

c. Observed Attitude and Gained Values

1. Customer first: a business exists to serve customers and earn their trust.
2. Honesty and ethics: accounts, claims and reports must be true and fair to all stakeholders.
3. Responsibility and accountability: managers answer for their decisions and results.
4. Evidence-based thinking: plans and decisions should be supported by facts and numbers.
5. Discipline and punctuality: regular reporting at fixed timings and daily attendance records.

d. Challenges Faced

Understanding terms such as break-even, contribution, span of control and TOWS was handled by using a glossary, worked examples in Excel and mentor guidance.

Separating facts from opinions in a case study was difficult at first; this was handled by listing facts with sources, then conclusions, and checking with the supervisor.

Choosing criteria and weights for a decision was handled by discussing the goals first and testing the result with different weights.

Working without real business data was handled by using sample cases, dummy figures and clear assumptions written beside each calculation.

Maintaining consistent documentation was handled by using daily log entries and reviewing feedback to improve documentation progressively.

Managing time between practice, documentation and report writing was handled by dividing work week by week and using review days for corrections.

e. Career Pathways

The knowledge gained supports careers such as Management Trainee, Business Analyst, Operations Executive, Marketing Executive, Sales Executive, Project Coordinator, Administrative Manager, HR Executive and Entrepreneur. Opportunities exist in companies, banks and financial firms, retail and e-commerce, manufacturing, education and healthcare, consulting firms, start-ups and family businesses, and in government and public sector organisations. Related study options include BBA, MBA or PGDM in various specialisations, CMA, CA and company secretary courses, and certifications in project management and business analysis. Because markets and technology change quickly, continuous learning and practical experience are essential.

CONCLUSION

The internship in Business Management was a valuable learning experience that integrated academic knowledge with practical activity. The programme achieved its objectives through structured learning, guided practice, assignments, supervisor review and documentation.

The student gained a clear understanding of how a business is planned, organised and controlled - through management principles, organisational structure, marketing, finance, operations, HR, strategy, SWOT analysis, decision making and case analysis - and acquired practical familiarity with goals and plans, organisation charts, marketing mix notes, budgets, break-even sheets, SWOT tables, decision matrices and case reports. The experience has strengthened the student's employability and provides a foundation for further study and work in management and entrepreneurship.

Reflection

Looking back, the most useful lesson of the internship was that management is a chain, and a chain is only as strong as its weakest link. Clear goals guide the plan, a suitable structure carries it out, marketing brings customers, finance keeps the business alive, operations deliver the promise, people make it happen, strategy gives direction and sound decisions keep it on course. The case study showed how a business can lose money when even one link is ignored. Moving from concept to practice to documentation made abstract ideas concrete, and supervisor feedback showed where understanding was weak. The habit of recording each day's work also made it easier to see progress over the weeks.

Objectives and Achievement

The objective of understanding management principles and organisational structure was achieved through concept sessions and an organisation chart. The objective of learning marketing, finance, operations and HR basics was achieved through a marketing mix note, an Excel budget and break-even sheet, a process map and a hiring plan. The objective of learning strategy, SWOT analysis and decision making was achieved through a strategy statement, a TOWS table and a decision matrix. The objective of learning case analysis and completing the project was achieved through the case study and the recommendation report. The objective of developing professional discipline was achieved through daily attendance, supervisor review and report writing.

Future Scope

The knowledge gained can support further study of management, commerce and entrepreneurship, and careers in companies, banks, retail, education, healthcare, consulting and start-ups. With growing digital business, small-town entrepreneurship, government support for start-ups and greater use of data in decisions, trained and ethical managers are increasingly needed, including in Bihar.

Suggestions for Improvement of the Programme

1. Include live practice on real business cases and talks by managers and local entrepreneurs, with appropriate permissions.
2. Continue regular mentor feedback and progress reviews.
3. Provide more project-based activities such as preparing a small business plan for a local enterprise under supervision.
4. Encourage students to maintain detailed daily documentation.
