ACKNOWLEDGEMENT

I express my sincere gratitude to RK NEXORA, RKNEXORA PRIVATE LIMITED, _____ (College Name), my faculty mentors and the internship supervisor, _____, for their guidance and support. The structured activities, learning resources and regular feedback helped me complete this internship in Social Media Marketing successfully.

I am thankful to the Head of the Department and the college mentor for their encouragement and for guiding me in preparing this report. I am also grateful to the management of RKNEXORA PRIVATE LIMITED for providing a professional learning environment and the opportunity to learn and apply my knowledge in a practical setting. The concept sessions, hands-on tasks with Canva designs and sample brand details, and the supervisor's patient and detailed feedback helped me understand how social media campaigns are planned and measured behind the scenes.

Finally, I thank my family and peers for their constant encouragement throughout the programme.

PREFACE

Internships are an important part of the undergraduate programme, as they allow students to see how classroom learning is applied in real organisations. The Four-Year Undergraduate Programme (FYUGP), introduced in line with the National Education Policy 2020, gives special importance to experiential learning, skill development and employability. This report has been prepared as part of the internship requirement of Magadh University and the Higher Education guidelines applicable in Bihar.

The report describes the internship undertaken in Social Media Marketing at RKNEXORA PRIVATE LIMITED, the plan followed, the work carried out, and the learning gained. Today people discover products, read reviews, ask for advice and decide what to buy on Instagram, Facebook, YouTube, WhatsApp and LinkedIn. Even a small shop, coaching centre, farm brand or local service provider in a town like Gaya can reach customers through a well-run social media page. But posting at random is not marketing. Good social media marketing needs a clear goal, a plan, attractive content, the right words, the right audience, regular conversation with followers and honest measurement of results. This internship offered a first-hand introduction to that work.

The report has been arranged in the order suggested by the University, beginning with the cover page and acknowledgement and ending with the conclusion and attendance sheet. It is hoped that the report gives a clear and honest account of the internship experience. All examples in it use dummy data and fictitious brands; no real customer information was handled.

EXECUTIVE SUMMARY

This report documents the internship completed in Social Media Marketing at RKNEXORA PRIVATE LIMITED (RK NEXORA - 'Campus to Career'). The programme required a minimum of 120 hours, completed over about four to five weeks (28 working days) with daily sessions of four to five hours, and was supported by an attendance log, supervisor guidance and review.

Background. Social media marketing is the use of social platforms to build a brand, connect with an audience, drive traffic and generate leads and sales. It combines creative work (designing posts and reels, writing captions), planning (content calendars and campaign goals), communication (replying to comments and messages), paid promotion (social ads) and analysis (reach, engagement and conversions). For a student from any discipline, the internship shows how creativity, communication, psychology, data and ethics come together in modern marketing.

Objectives. The internship aimed to (i) build a structured understanding of social media platforms and their uses, (ii) learn content calendar planning, post and reel design, caption writing and hashtag research, (iii) learn audience targeting and the basics of paid social campaigns, (iv) learn community engagement, (v) learn social analytics and competitor analysis, and (vi) develop communication, documentation and professional discipline.

Work carried out. The student first studied the features, audiences and uses of Instagram, Facebook, YouTube and LinkedIn, then worked through content calendar planning, post and reel design, caption and copywriting, hashtag research, audience targeting, paid social campaigns, community engagement, social analytics and competitor analysis. Each topic had a concept session followed by a hands-on task using Canva, sample brand details and dummy data. The later part of the programme was devoted to a case study, a mock practical exercise, supervisor review and preparation of this report.

Project. The work was tied together in a project titled *Social Media Campaign Planning & Execution*, in which a content calendar was planned, posts and reels were created and engagement was tracked through analytics.

Method. A blended method was followed - learn, practise, document and review - supported by a daily attendance log with day-wise remarks and regular feedback from the supervisor.

Learning gained. The student gained a clear understanding of how social media campaigns are planned and measured, practical familiarity with content calendars, Canva designs, captions, hashtag sets, audience definitions, ad budgets and analytics formulas in MS Excel, awareness of advertising and influencer disclosure rules, and improved communication, creativity and professional discipline.

Key observations. Content that is planned around a clear goal and audience performs better than random posting; the first seconds of a reel and the first line of a caption decide whether people stay; replying to people builds trust; and results must be measured and used to improve the next round.

Conclusion. The internship met its objectives and contributed to the student's academic understanding, employability and confidence. The report follows the University's suggestive format: cover page, acknowledgement, certificate, contents, preface, executive summary, about the agency, plan and execution, learning outcome, conclusion and attendance sheet.

ABOUT THE AGENCY

RK NEXORA, a unit of RKNEXORA PRIVATE LIMITED, provides structured internship and skill-development programmes under the theme 'Campus to Career'. The organization focuses on academic-industry alignment, practical exposure, assessment, documentation and employability-oriented learning.

Particulars	Details
Name of Agency	RKNEXORA PRIVATE LIMITED
Programme / Unit	RK NEXORA - Campus to Career
Registered Office	C/O Mukesh Kumar, Khiri, PS Atri, Jethiyan, Atri, Gaya - 805236, Bihar, India
CIN	U85499BR2026PTC086757
Email	rknexorapvtltd@gmail.com
Website	www.rknexora.org
Internship Topic	Social Media Marketing

1. Vision

To support students in developing practical, professional and industry-relevant capabilities.

2. Mission

To deliver structured learning experiences that connect academic knowledge with workplace expectations.

3. Activities of the Agency

1. Structured internship programmes aligned with university and higher-education requirements.
2. Skill-development learning modules, practical activities and assignments.
3. Attendance tracking, supervision, assessment and documentation.
4. Employability-oriented guidance connecting campus learning to career readiness.

4. Programme Structure

The internship programme is organised around a fixed number of learning hours, completed over a defined period. Each intern is registered on the internship portal with a unique registration number, is assigned a supervisor, follows a day-wise plan and maintains an attendance log. Learning is organised into three phases: **Orientation** (Days 1-2), **Learning and Practice** (Days 3-22, ten sub-topics of two days each: one concept day and one hands-on day) and **Project and Review** (Days 23-28), followed by a concluding review.

5. Role of the Supervisor

The internship supervisor assigned by the agency guided the student through the programme, explained concepts, assigned practice tasks, reviewed the daily log and gave feedback. The supervisor also verified attendance and reviewed the student's work at the end of the programme.

PLAN AND EXECUTION

1. Objectives

The internship was planned around the following objectives, each linked to a part of the programme:

1. Understand Social Media Marketing - meaning, importance, goals and the features, audiences and uses of Instagram, Facebook, YouTube and LinkedIn (Week 1).
2. Learn content calendar planning - planning posts, themes, dates and the posting schedule (Week 1).
3. Learn content creation - designing posts, reels and graphics in tools such as Canva, writing captions, hooks and calls to action, and researching hashtags (Week 2).
4. Learn audience targeting and paid social campaigns - defining audiences by age, interests and location, and setting up ads, budget, objective and targeting (Week 3).
5. Learn community engagement - replying to comments and messages and building follower interaction (Week 3).
6. Learn social analytics and competitor analysis - reach, impressions, engagement, follower insights and a study of competitors' content (Week 4).
7. Develop professional discipline - communication, creativity, ethical and legal awareness, documentation and report writing (throughout).

2. Methodology

The programme followed a blended method made up of four connected steps, repeated for each topic:

Learn. Each topic began with a concept session in which the supervisor explained the purpose of the function, its main tools and how it connects with the other parts of a social media campaign. Notes were prepared in the student's own words.

Practise. The concepts were then applied in guided hands-on tasks - comparing platforms, building a content calendar in MS Excel, designing posts, carousels and reels in Canva, writing captions with hooks and calls to action, preparing hashtag sets, defining audience personas, drawing up a sample ad plan with budget, writing reply templates, calculating engagement metrics and auditing sample competitor pages. Only fictitious brands, sample data and public information were used, so that no real customer information was handled and no real money was spent on ads.

Document. Every day's work was recorded in the internship attendance log with a short remark, and designs, calendars and reports were saved so that the work could be reviewed.

Review. The supervisor reviewed the work, pointed out errors and suggested improvements. Review days, a case study and a mock practical exercise helped to consolidate the learning.

3. Understanding Social Media Marketing - Concepts Studied

3.1 What is social media marketing

Social media marketing is the planned use of social networks and platforms to promote a brand, product, service or cause. Its goals can be to create awareness (people come to know the brand), to build engagement (people like, comment, share and save), to drive traffic (people visit a website, shop or WhatsApp chat), to generate leads (people share their contact details or send enquiries), to make sales, to provide customer service, and to build loyalty and advocacy. These goals follow the marketing funnel: awareness, consideration, conversion and loyalty. A good plan decides which goal comes first and uses SMART objectives - Specific, Measurable, Achievable, Relevant and Time-bound - such as 'increase Instagram followers from 1,200 to 1,500 in thirty days' rather than 'get more followers'.

Social media differs from traditional advertising because communication is two-way. People do not only see a message; they respond, share it, argue with it or ask questions, and the brand is expected to reply. Content is also seen in a crowded feed, so it must earn attention within seconds. A brand's personality, or brand voice, whether friendly, professional, funny or caring, should stay the same across posts, and the content should give value to the audience through information, entertainment, inspiration or offers, and not only through selling.

3.2 Social media platforms overview

Each platform has its own features, audience and style, and a brand should choose platforms by looking at where its customers are, what content it can produce regularly and what its goal is. **Instagram** is a visual platform with feed posts, carousels, Stories, Reels, Live and direct messages, popular with young and urban users and strong for fashion, food, lifestyle, education and local business. **Facebook** has pages, groups, events and the Marketplace, with a wide age range and strong local community use, and remains useful for local shops, community groups and older audiences. **YouTube** is a video platform and also the second most used search engine for many tasks, ideal for long videos, tutorials, reviews and short vertical videos called Shorts; success there depends on titles, thumbnails, watch time and subscribers. **LinkedIn** is a professional network used for company pages, jobs, thought-leadership articles and business-to-business marketing, and suits training institutes, consultancies and recruitment. **WhatsApp Business** is widely used in India for catalogues, quick replies, broadcast lists and customer support, and **X**, **Telegram**, **Pinterest** and **Snapchat** serve other purposes such as news, communities and inspiration.

The platforms are owned by different companies and keep changing their features, formats and algorithms, so the learner must follow platform help pages and official updates. The students studied how a single idea, for example a festival offer, can be adapted for each platform: a short reel and a story for Instagram, an event post and a local group share for Facebook, a longer explainer for YouTube and a professional angle for LinkedIn.

3.3 Content calendar planning

A content calendar is a schedule of what will be posted, where and when. It turns social media from a daily scramble into an organised plan. A good calendar includes the date and day, the platform, the content pillar or theme (for example education, entertainment, behind-the-scenes, customer stories and offers), the format (image, carousel, reel, story, video or poll), the topic and hook, the caption and hashtags, the call to action, the person responsible, the status (idea, in design, approved, scheduled, posted) and the target metric. It is usually prepared monthly and reviewed weekly in a spreadsheet or a planning tool, and many teams create content in batches and use scheduling tools such as Meta Business Suite to post at the best times.

Planning starts with the goals and audience and moves to content pillars, then to a list of important dates and festivals. In Bihar, for example, Chhath Puja, Diwali, Holi, Eid, Durga Puja, Makar Sankranti, exam seasons and local fairs are big moments, and national days and trending topics also matter. A healthy calendar keeps a mix of content types, does not try to sell in every post, leaves space for unplanned trending or news-based posts and is reviewed against results at the end of each month.

3.4 Post and reel design

Design makes the audience stop scrolling. Canva is a popular tool with templates, fonts, icons, photos, video editing and a Brand Kit for storing a brand's logo, colours and fonts. Basic design principles are a clear visual hierarchy (the most important element is the biggest or boldest), strong contrast between text and background, alignment and spacing, limited fonts and colours, consistency with the brand, enough white space and readable text size on a phone. Every design should carry one main message. Carousels are useful for step-by-step tips and stories because people swipe through, while a single image suits announcements and offers.

Different formats need different sizes. Instagram feed posts commonly use a portrait ratio such as 1080 x 1350 pixels (or square 1080 x 1080), Stories and Reels use a vertical 9:16 format of 1080 x 1920 pixels, a YouTube thumbnail uses 1280 x 720 pixels, and Facebook and LinkedIn link images use a wide format of about 1200 x 630 pixels. In Stories and Reels, important text must stay inside the safe zone, away from the top and bottom areas where the platform places its own buttons. A good reel starts with a hook in the first one to three seconds,

tells one idea quickly, uses on-screen text and captions because many people watch without sound, keeps a steady pace and ends with a call to action. Mobile editing apps and Canva's video editor can be used for trimming, text, transitions and music.

Visual content also carries legal and ethical duties. Only images, music, fonts and clips that the brand owns, has permission to use or has a licence for should be used, so templates and elements should follow Canva's licence terms and commercial music should be used only as allowed for business accounts. Photographs of people, especially children, need their consent. Designs should be accessible, with readable contrast, captions on videos and text descriptions (alt text) for images.

3.5 Caption and copywriting

Copywriting is writing words that make people act. A caption should begin with a hook, because only the first line is visible before the 'more' link, and the hook must raise curiosity, name a problem or make a promise. Common frameworks are AIDA (Attention, Interest, Desire, Action) and PAS (Problem, Agitate, Solve). Good captions use simple words and short sentences, speak to one reader as 'you', match the brand voice and the language of the audience (Hindi, English or a mix, with local flavour where it fits), include a clear call to action such as 'comment your favourite', 'save this for later', 'send us a message' or 'call now', and use emojis only in moderation. The most important information, such as price, date or contact, should not be hidden in the end of a long text.

Copy must be honest. Claims such as 'best', 'guaranteed' or 'pure' need proof, and misleading advertisements are against the Consumer Protection Act, 2019 and the Code of the Advertising Standards Council of India (ASCI). Influencer and brand posts that are paid or gifted must carry a clear disclosure, such as 'Ad' or 'Sponsored', in line with the endorsement guidelines of the Department of Consumer Affairs and ASCI. Proofreading for spelling, grammar and facts before posting is essential.

3.6 Hashtag research

Hashtags help to organise content and to make it discoverable by people who search or follow a topic. The main types are branded hashtags (unique to the brand or a campaign), community hashtags, topic or niche hashtags, location hashtags (such as the city or state) and trending hashtags. A balanced set mixes a few broad tags with reach, some medium and niche tags where competition is lower, and one or two branded and location tags. Hashtags must be relevant to the content; adding unrelated popular tags is seen as spam and can reduce reach. Compound hashtags should use capital letters for each word (for example #LocalSweets) so that they are easier to read and are read correctly by screen readers.

Research is done by searching the platform for the topic and looking at suggested and related tags, studying the tags used by competitors and top posts, noting how many posts a tag has (to judge competition) and testing sets over several posts. The results are tracked through insights to see how many people reached by hashtags and which sets perform best. Platforms change their guidance on the number and role of hashtags, so a small number of well-chosen tags, together with strong content and keywords in the caption, is the usual practice.

3.7 Audience targeting

Marketing works best when it speaks to a defined audience. An audience persona is a short description of a typical customer: age, gender, location, language, occupation, income, interests, habits on social media, needs and problems, and what makes them buy. For a local sweet shop, one persona might be a family in Gaya town that orders sweets for festivals; another might be a college student looking for snacks. Audiences can be defined by demographics (who they are), geography (where they are) and psychographics or behaviour (what they like and do).

In Meta's advertising system, audiences can be created in three main ways: core audiences, defined by location, age, gender, language and interests or behaviours; custom audiences, built from people who already know the brand, such as those who engaged with the page or visited the website, or a customer list (which must be collected with consent and handled under the Digital Personal Data Protection Act, 2023); and lookalike or

similar audiences, which find new people who resemble the best existing customers. For a local business, a radius of a few kilometres around the shop or selected towns is often the best location setting. The audience should not be too narrow (the ad will not be delivered well) or too broad (money is wasted), and the platform shows an estimate of the audience size to help in the decision. Ads must follow platform policies, including limits on how sensitive characteristics can be used.

3.8 Paid social campaigns

Organic reach, which means the number of people who see content without payment, is limited, so brands also use paid promotion. On Meta platforms, a post can be quickly *boosted*, or a full campaign can be built in Ads Manager. A campaign has three levels: the **campaign**, where the objective is chosen (such as awareness, traffic, engagement, leads or sales); the **ad set**, where the audience, placements (feed, Stories, Reels), budget and schedule are set; and the **ad**, which contains the creative (image or video), text, headline and call-to-action button. Budget can be daily or for the whole campaign, and ads are delivered through an auction in which the platform balances the advertiser's bid, the expected response and the ad's quality. New ads enter a learning phase, and large changes during this phase can reset it. In India, ad bills also include tax such as GST.

The key paid metrics are impressions (total times the ad was shown), reach (unique people who saw it), frequency (impressions divided by reach), CPM (cost per thousand impressions), CPC (cost per click), CTR (click-through rate: clicks divided by impressions, multiplied by 100), CPL (cost per lead), CPA (cost per action) and ROAS (return on ad spend: revenue divided by ad spend). Good campaigns start with a small test budget, compare two versions of an ad by changing one thing at a time (A/B testing), switch off the weak ad and move money to the stronger one. Tracking tools such as the Meta Pixel and UTM tags in links help to connect ads to website visits and sales. Ads should respect advertising standards, avoid misleading claims and use properly licensed creative.

3.9 Community engagement

Social media is a conversation, and a page that does not reply loses trust. Community engagement means responding to comments, direct messages and mentions, asking questions, running polls, sharing customer stories and building a feeling of belonging. A good community manager replies quickly (a target such as within a few hours on working days), uses a friendly and respectful tone, addresses the person by name, answers with useful information, uses saved replies or WhatsApp Business quick replies for common questions without sounding robotic, and moves private matters such as order details to direct messages.

Negative comments should be treated carefully. The method is to acknowledge the concern, apologise if the brand is at fault, offer a solution or take the matter to a private chat and follow up. Honest criticism should not be deleted; only abusive, hateful or spam comments should be hidden or reported according to the page's moderation guidelines. Serious complaints are escalated to the manager. Engagement can be increased through user-generated content shared with permission, collaborations with local creators, contests and giveaways that follow platform rules and the law, and live sessions. Buying followers or likes, using bots or joining engagement groups gives a false picture, harms credibility and is against platform rules, so it is not an ethical practice.

3.10 Social analytics

Analytics shows what is working. The main metrics are **reach** (unique people who saw the content), **impressions** (total views), **engagement** (likes, comments, shares and saves), **engagement rate** (engagements divided by reach or by followers, multiplied by 100, with the method stated clearly), **follower growth**, **profile visits**, **link clicks**, **video views, watch time and retention** (how long people keep watching), and **audience insights** such as age, gender, city and active times. Saves and shares are usually stronger signs of valuable content than likes. Metrics are found in Meta Business Suite and Instagram Insights, YouTube Studio and LinkedIn Analytics, and website traffic can be studied in Google Analytics.

A useful report is not only a collection of numbers. It compares results with the goals set at the beginning, identifies the best and the weakest posts and the reasons, checks which formats, topics, hashtags and posting

times work, and recommends actions for the next period. Vanity metrics such as follower count alone are less useful than actionable metrics such as saves, enquiries and sales. Reports are usually prepared weekly or monthly, and the same method is used every time so that figures can be compared.

3.11 Competitor analysis

Competitor analysis means studying other brands that sell to the same audience in order to learn what works, find gaps and set realistic benchmarks. The competitors are identified (direct ones that sell the same product, and indirect ones that satisfy the same need), and for three to five of them the analyst records the platforms used, number of followers, posting frequency, types of content, main themes, tone, hashtags, engagement rate, response to comments, offers and, where available, the ads they run, which can be viewed in the Meta Ad Library. The findings are summarised in a comparison and a SWOT analysis, with a list of gaps, such as no local-language content, no educational posts or slow replies, which the brand can turn into opportunities.

Competitor analysis must be ethical and legal: only public information is used, content is never copied, and the aim is to learn and differentiate, not to imitate. Social listening, which means monitoring mentions of the brand, competitors and topics, can also reveal customer problems and ideas for content.

3.12 Rules, ethics and limitations

Social media marketers must follow several laws and codes. The **Information Technology Act, 2000** and the **IT (Intermediary Guidelines and Digital Media Ethics Code) Rules, 2021** govern online conduct and platform duties. The **Copyright Act, 1957** protects images, music, videos and text, so permission or a licence is needed. The **Trade Marks Act, 1999** protects brand names and logos. The **Consumer Protection Act, 2019**, the guidelines for prevention of misleading advertisements and endorsements and the **ASCI Code** require truthful claims and clear disclosure of paid partnerships. The **Digital Personal Data Protection Act, 2023** governs the collection and use of personal data, including customer lists and contest entries. Platform terms and policies must also be followed. Good practice includes respecting privacy, avoiding fake reviews and fake accounts, being careful with sensitive and political content, taking care when using generative AI tools (their output must be checked for accuracy, originality and rights, and disclosed where required) and having a plan to handle a crisis, such as an offensive post or a viral complaint, quickly and honestly. Platform features, rules and algorithms change often, so the numbers and sizes in this report are for learning and must be checked against current official guidance.

4. Week-wise Plan and Execution

Week	Days	Activities
Week 1	Days 1-6	Orientation and foundations: company induction, introduction to social media marketing, social media platforms overview, and content calendar planning.
Week 2	Days 7-12	Content creation: post and reel design, caption and copywriting, and hashtag research, each with a concept session and a hands-on task.
Week 3	Days 13-18	Reach and relationship: audience targeting, paid social campaigns, and community engagement.
Week 4	Days 19-24	Measure and learn: social analytics, competitor analysis, a case study exercise and a mock practical exercise.
Week 5	Days 25-28	Project closure: supervisor review and feedback, internship report drafting, presentation preparation and final review.

5. Week-wise Narrative

Week 1: The first week was devoted to orientation and foundations. After company induction, the student was introduced to social media marketing and studied the features, audiences and uses of Instagram, Facebook,

YouTube and LinkedIn. The week ended with a study of content calendar planning - posts, themes, dates and the posting schedule - supported by the preparation of a sample monthly calendar.

Week 2: In the second week the study moved to post and reel design - designing posts, reels and graphics in tools like Canva - followed by caption and copywriting, covering captions, hooks and calls to action, and hashtag research, covering relevant and trending hashtags and tracking their reach.

Week 3: The third week focused on audience targeting - defining the audience by age, interests and location; paid social campaigns - setting up ads, budget, objective and targeting; and community engagement - replying to comments and messages and building follower interaction.

Week 4: In the fourth week the student studied social analytics - reach, impressions, engagement and follower insights - and competitor analysis - studying competitors' content, posting frequency and engagement. A case study exercise and a mock practical exercise were completed in this week.

Week 5: The last week was devoted to project closure: supervisor review and feedback, drafting of the internship report, preparation of a presentation and final review before submission.

6. Topic-wise Learning in Detail

6.1 Social Media Platforms Overview

Concept: Features, audiences and uses of Instagram, Facebook, YouTube and LinkedIn. *Practice carried out:* Preparing a platform comparison note with audience, content type, strengths and best use for a sample business, and choosing the platforms for the sample campaign.

6.2 Content Calendar Planning

Concept: Planning posts, themes, dates and the posting schedule. *Practice carried out:* Preparing a monthly content calendar in MS Excel with pillars, formats, festivals, hashtags, call to action and status columns.

6.3 Post and Reel Design

Concept: Designing posts, reels and graphics in tools like Canva, with design principles and correct sizes. *Practice carried out:* Designing a brand kit, a single-image post, a five-slide carousel and a short vertical reel with text and captions.

6.4 Caption and Copywriting

Concept: Writing captions, hooks and calls to action using AIDA and PAS. *Practice carried out:* Writing five captions for the sample posts, rewriting weak captions with stronger hooks and proofreading them for accuracy and disclosure.

6.5 Hashtag Research

Concept: Finding relevant and trending hashtags and tracking their reach. *Practice carried out:* Researching and grouping hashtags into branded, location, niche and broad sets and recording their post counts in a sheet.

6.6 Audience Targeting and Paid Social Campaigns

Concept: Defining the audience by age, interests and location; setting up ads, budget, objective and targeting. *Practice carried out:* Writing two audience personas and a sample ad plan with objective, audience, placements, budget, creatives and metrics, without spending real money.

6.7 Community Engagement

Concept: Replying to comments and messages and building follower interaction. *Practice carried out:* Preparing reply templates for common questions, a negative comment handling guide and a polite way to move conversations to direct messages.

6.8 Social Analytics and Competitor Analysis

Concept: Reach, impressions, engagement and follower insights; studying competitors' content, posting frequency and engagement. *Practice carried out:* Calculating engagement metrics from sample insights in MS Excel; auditing three sample competitor pages and preparing a gap and action summary.

7. Rules, Ethics and Good Practice - Points Studied

Social media marketing operates in a legal and ethical framework. Content must respect the **Copyright Act, 1957** and the **Trade Marks Act, 1999**, advertising claims must be truthful under the **Consumer Protection Act, 2019** and the **ASCI Code**, paid partnerships must be disclosed clearly, customer data must be handled under the **Digital Personal Data Protection Act, 2023**, and the **Information Technology Act, 2000** and the **2021 Intermediary Rules** apply to online conduct. Each platform also has community standards and advertising policies that must be followed.

Good practice includes using a consistent brand voice, giving value to the audience, being honest about products and prices, respecting people's privacy and consent, avoiding fake followers, fake reviews and clickbait, giving credit for borrowed ideas and content, replying politely even to criticism, checking facts before posting, keeping passwords and page access safe with two-step verification, and keeping a record of approvals for every campaign.

8. Process Flows Studied

Process mapping was used to understand how a social media campaign moves from idea to results and who is responsible at each step. The main flows studied were:

- **Campaign planning:** Goal and SMART objective > Audience and persona > Platform selection > Content pillars > Content calendar > Budget and team > Launch > Review.
- **Content production:** Idea > Brief > Design or video > Caption and hashtags > Internal review and approval > Scheduling > Posting > Monitoring comments.
- **Paid campaign:** Objective > Audience > Placement and budget > Creative and text > Policy review > Launch and learning phase > A/B test > Optimise or stop.
- **Community management:** Notification > Read and classify (question, praise, complaint, spam) > Reply or escalate > Move to private chat if needed > Record and follow up.
- **Reporting:** Collect insights > Calculate metrics > Compare with goals > Find top and weak content > Draw lessons > Plan next period.
- **Competitor study:** Select competitors > Collect public data > Compare and benchmark > Find gaps > Decide actions.

9. Worked Examples with Sample (Dummy) Data

The examples below use a fictitious local business, *Mithila Mithai Ghar*, a sweets and snacks shop in a town in Bihar. All names, numbers and results are dummy figures for learning.

Example A: Goal and audience

The sample goal for one month before and during the festival season was: grow the Instagram followers from 1,200 to 1,500 (an increase of 25%), receive at least 40 WhatsApp order enquiries, and reach an average engagement rate of 5% on reels. The target audience was defined in two personas: *Family customers* (age 28 to 50, living in the town, who order sweets for festivals and family functions, prefer Hindi, and use Facebook and WhatsApp) and *Young customers* (age 18 to 27, college students and young professionals who watch reels and look for snacks and gifts, and use Instagram). The platforms chosen were Instagram (main), Facebook (local community) and WhatsApp Business (orders).

Example B: One-week content calendar

A sample week from the calendar is shown below. Each row has the platform, format, content pillar, topic with hook and the call to action.

Day	Platform	Format	Pillar	Topic and hook	CTA
Mon	Instagram	Reel	Behind the scenes	How our laddoos are made fresh every morning	Save
Tue	Facebook	Image	Offer	Festival box: 10% off on bookings till Friday	Call or message
Wed	Instagram	Carousel	Education	5 tips to store sweets safely in summer	Share
Thu	Instagram	Story	Engagement	Poll: your favourite sweet for the festival	Vote
Fri	YouTube	Short	Entertainment	Guess the sweet from the sound	Comment
Sat	Instagram	Reel	Customer story	A family's festival order, in their own words	Order now
Sun	All	Image	Inspiration	Festival greeting with shop timings	Visit us

Example C: Rewriting a caption

The first caption read: 'We have new sweets. Come and buy. Good quality.' It was rewritten with the AIDA method. *Attention:* 'Festival mornings smell like fresh ghee.' *Interest:* 'Our laddoos are made every day before sunrise with pure desi ghee and no artificial colour.' *Desire:* 'Imagine opening a box that is still soft and fragrant.' *Action:* 'Message us on WhatsApp today to book your festival box. Save this post for the order reminder.' The rewritten caption has a hook, a benefit, a feeling and a clear call to action. Before posting, the claim 'pure desi ghee' was checked with the shop owner, because a claim must be true.

Example D: A hashtag set

For the laddoo reel, a hashtag set of seven tags was prepared: one branded tag (#MithilaMithaiGhar), two location tags (#GayaFood and #BiharSweets), two niche tags (#DesiGheeLaddoo and #FestivalSweets) and two broader tags (#IndianSweets and #FoodReels). The student noted the post counts of each tag to judge competition and removed one very broad tag with millions of posts, because the post would be buried. After posting, the insights showed which tags brought viewers, and the set was adjusted for the next post.

Example E: Paid campaign metrics

A sample seven-day awareness-to-enquiry campaign had a budget of Rs. 3,000 (before tax). The ad was shown 31,000 times (impressions) to 25,000 unique people (reach). Frequency = 31,000 / 25,000 = 1.24. There were 620 link clicks to the WhatsApp chat, so CTR = 620 / 31,000 x 100 = 2.0%. CPM = 3,000 / 31,000 x 1,000 = about Rs. 96.8. CPC = 3,000 / 620 = about Rs. 4.84. Of those who clicked, 45 sent an enquiry, so CPL = 3,000 / 45 = about Rs. 66.7. Out of the enquiries, 18 became orders with an average value of Rs. 450, so revenue = 18 x 450 = Rs. 8,100 and ROAS = 8,100 / 3,000 = 2.7. In an A/B test, the reel creative had a CTR of 2.6% against 1.4% for the image creative, so the budget was moved to the reel.

Example F: Analytics summary

For the month, 12 posts and 8 reels were published. Followers rose from 1,200 to 1,410, a growth of 210 or 17.5% against the target of 25%. The best reel (the laddoo making video) reached 7,800 people, with 9,500 views, 420 likes, 60 comments, 85 shares and 140 saves. Engagements = 420 + 60 + 85 + 140 = 705, so the engagement rate on reach = 705 / 7,800 x 100 = about 9.0%. The weakest posts were plain festival greetings with a reach of only a few hundred. Carousels with tips received the most saves. The report recommended more

behind-the-scenes reels and educational carousels, fewer generic greeting posts and a posting time of around 7 to 9 in the evening, when the audience insights showed the highest activity.

Example G: Competitor snapshot

Three sample competitors were audited. *Competitor 1* posts five times a week, mostly product photographs, and has an engagement rate of about 1.5%; replies to comments are slow. *Competitor 2* posts three reels a week and has an engagement rate of about 4% but uses only English captions. *Competitor 3* has been inactive for two months. The gaps found were local-language educational content, customer stories and fast replies. The recommended actions were to keep Hindi captions with friendly local words, post customer stories, reply within two hours and use reels as the main format.

10. Project: Social Media Campaign Planning & Execution

Scope. The internship work was organised around a project in which a content calendar was planned and posts and reels were created for a fictitious brand, and engagement was tracked through analytics using sample insights.

Steps followed. (i) Studied the platforms and set the goals and personas; (ii) prepared a monthly content calendar with pillars, formats, festivals and hashtags; (iii) designed a brand kit, posts, a carousel and reels in Canva; (iv) wrote captions with hooks and calls to action and prepared hashtag sets; (v) prepared an audience and ad plan with budget and metrics, and reply templates for community management; (vi) calculated engagement metrics, prepared an analytics report with a competitor summary and reviewed the work with the supervisor.

Skills and tools. Content Calendar, Canva, Copywriting, Hashtag Research, Meta Ads Basics and Social Analytics.

Outputs. Platform comparison, content calendar, post and reel designs, captions and hashtag sets, audience personas, sample ad plan, reply templates, analytics and competitor report, and this internship report.

11. Case Study Exercise: Daily Posting but No Sales

A case study exercise was completed on a typical social media problem. The business and figures are illustrative and not taken from any real organisation.

Background. A small bakery (fictitious) in a town opened an Instagram page and a Facebook page six months ago. The owner's nephew posts one photograph every day, takes part in a followers-for-followers group and once boosted a post for Rs. 2,000 using the default settings.

Problem observed. The page had more than 5,000 followers but each post received only a few likes, almost no comments and hardly any orders. Many followers were from other states or were inactive. Messages were answered after two or three days. The boosted post reached people all over the country, but nobody ordered. The owner felt that social media does not work and wanted to stop.

Analysis. The page had no goal, no audience definition and no content plan. Posting daily random product photographs without a hook, caption or call to action did not give people a reason to respond. Followers gained through exchange groups were not real customers, which also reduced the engagement rate and the platform's willingness to show posts to more people. The boosted post used a broad audience and no local targeting, so the money was wasted. Slow replies lost the few people who were interested. No one checked analytics.

Recommendations. (1) Set one clear goal, such as getting 30 local orders in a month through WhatsApp. (2) Define the audience: families and young people within about ten kilometres. (3) Prepare a content calendar with three to four pillars such as behind-the-scenes, customer stories, cake tips and offers, using reels as the main format. (4) Improve captions with hooks and a call to action and use local and niche hashtags. (5) Stop follower-exchange practices and focus on real local followers. (6) Run a small, well-targeted ad with a WhatsApp objective and test two creatives. (7) Reply to messages within a couple of hours with saved replies. (8) Review insights every week and report simple results to the owner.

Expected result and lesson learned. With a clear goal, a local audience, better content and quick replies, the same effort is expected to bring real enquiries and orders. The lesson is that followers and likes are not the goal; social media works when it is planned, measured and connected to what the customer actually wants.

12. Mock Practical Exercise: A Two-Week Campaign from Start to Finish

In the mock practical exercise the student planned and prepared a two-week campaign for a sample (dummy) local brand, from the first goal to the final report, using the tools and methods practised earlier. The steps followed were:

1. **Goal and audience:** wrote a SMART objective and two personas and chose the platforms.
2. **Competitor check:** audited three competitor pages and listed gaps and benchmarks.
3. **Calendar:** prepared a two-week content calendar with pillars, formats, festivals and a budget for ads.
4. **Creative:** designed a brand kit, two posts, a carousel and a reel in Canva.
5. **Copy and hashtags:** wrote captions with hooks and calls to action and prepared hashtag sets.
6. **Paid plan:** prepared an ad set with objective, audience, placements, daily budget and two creatives for an A/B test.
7. **Engagement:** prepared reply templates and a plan to answer comments and messages within a fixed time.
8. **Analytics and report:** used sample insights to calculate reach, engagement rate, CTR, CPC and ROAS and wrote a one-page report with lessons and next steps.

The exercise showed that every step depends on the one before it: unclear goals lead to confused content, weak targeting wastes the ad budget, and without analytics the next campaign cannot be improved.

13. Sample Checklists Prepared

Checklists were prepared as part of the hands-on tasks. They reduce errors and make routine work easier to review.

Content Calendar Checklist

- Goal, audience and platforms written at the top of the calendar.
- Content pillars and posting frequency decided.
- Festivals, local events and important dates marked.
- Each entry has date, platform, format, topic, hook, caption, hashtags and call to action.
- Owner, approval status and posting time recorded.
- Space left for trending or last-minute posts.
- Monthly review of results planned.

Design and Reel Checklist

- Correct size and ratio for the platform.
- One clear message with a strong hook in the first seconds.
- Brand colours, fonts and logo used consistently.
- Text is readable on a phone and inside the safe zone.
- Captions or on-screen text added for muted viewing.
- Images, music and fonts are licensed or owned.
- Alt text added and permission taken for people shown.

Caption and Hashtag Checklist

- First line is a hook that makes people stop.
- Simple language in the audience's language and brand voice.
- Claims are true and can be proved; paid content is disclosed.
- Clear call to action included.
- Spelling, grammar, price, date and contact details checked.
- A balanced set of relevant hashtags, with capital letters for compound tags.
- No banned, spammy or irrelevant hashtags.

Paid Campaign Checklist

- One clear objective chosen.
- Audience defined by location, age, language and interest, with a reasonable size.
- Placements, schedule and daily budget set; taxes noted.
- Two creatives or texts prepared for an A/B test.
- Landing point (website or WhatsApp) tested and links tagged.
- Ad follows platform policies and advertising standards.
- Metrics to track (reach, CTR, CPC, CPL, ROAS) decided in advance.

Community Management and Reporting Checklist

- Comments and messages checked at fixed times and replied to within the target time.
- Saved replies used with a personal touch.
- Negative comments answered politely; abusive or spam comments hidden or reported.
- Serious complaints escalated to the manager.

- Weekly insights collected and engagement rate calculated by a stated method.
- Top and weak content and reasons noted.
- Lessons and next actions written in the report.

14. Tools and Resources

Learning materials, free versions of Canva for graphics and video, Meta Business Suite and Instagram, Facebook and YouTube Insights (on sample or demo accounts), mobile video editing apps, MS Excel for calendars and metrics, MS Word and PowerPoint for documentation and presentation, platform help centres and the Meta Ad Library for public ad information, ASCI and consumer protection guidelines for reference, assignments and mentor feedback were used during the internship.

15. Programme at a Glance

The programme was in the domain of Social Media Marketing with RKNEXORA PRIVATE LIMITED as the agency. It required a minimum of 120 hours over 28 learning days, organised in three phases: Orientation (Days 1-2), Learning and Practice (Days 3-22) and Project and Review (Days 23-28). Attendance was recorded in the Internship Attendance Log, signed by the supervisor (see Attendance Sheet).

LEARNING OUTCOME

a. Knowledge Acquired

1. Meaning, goals and funnel of social media marketing and the features, audiences and best uses of Instagram, Facebook, YouTube and LinkedIn.
2. How to plan a content calendar with pillars, formats, festivals and a posting schedule.
3. Principles of post and reel design, correct formats and sizes, and how to write captions, hooks and calls to action.
4. How to research hashtags and how to define audiences by age, interests and location.
5. How paid social campaigns are structured (campaign, ad set, ad), and the meaning of reach, impressions, CTR, CPC, CPL and ROAS.
6. How to manage a community, reply to comments and messages and handle negative comments.
7. How to read analytics, calculate engagement rate, study competitors and follow the legal and ethical rules of advertising and data use.

Glossary of Terms Learned

- **SMM** - Social Media Marketing: use of social platforms to promote a brand.
- **Organic / Paid reach** - Views without payment / views obtained through ads.
- **Content pillar** - Main theme or category of content that a brand posts regularly.
- **Content calendar** - Schedule of content to be posted, with dates, platforms and formats.
- **Reel / Story / Carousel** - Short vertical video / 24-hour post / multi-slide swipe post.
- **Hook** - Opening line or first seconds that grab attention.
- **CTA** - Call to action: the step the audience is asked to take.
- **AIDA / PAS** - Attention-Interest-Desire-Action / Problem-Agitate-Solve copywriting frameworks.
- **Hashtag** - Tag starting with # that groups and helps to discover content.
- **Persona** - Description of a typical customer used for targeting.
- **Custom / Lookalike audience** - Audience built from existing contacts or engagement / audience similar to best customers.
- **Impressions / Reach** - Total views / unique people who saw the content.
- **Frequency** - Impressions divided by reach.
- **CPM / CPC / CTR** - Cost per thousand impressions / cost per click / click-through rate.
- **CPL / CPA / ROAS** - Cost per lead / cost per action / return on ad spend.
- **Engagement rate** - Engagements divided by reach or followers, as a percentage.
- **A/B test** - Comparing two versions to find which performs better.
- **UTM tag** - Code added to a link to track where traffic comes from.
- **UGC** - User-generated content created by customers.
- **Social listening** - Monitoring online mentions of a brand, competitor or topic.

b. Skills Learned

Technical skills. Choosing platforms and setting SMART goals; building content calendars in MS Excel; designing posts, carousels and reels in Canva; writing hooks, captions and calls to action; researching and grouping hashtags; defining audience personas; planning ad campaigns with budget and A/B tests; calculating reach, engagement rate, CTR, CPC, CPL and ROAS; and auditing competitors.

Professional skills. Creative thinking and storytelling; clear and polite written communication; customer-friendly community handling; attention to detail and proofreading; time management and meeting posting deadlines; ethical and legal awareness; teamwork and acceptance of feedback; and documentation, report writing and presentation.

These skills were developed through repeated practice and daily documentation. Designing and rewriting content improved creativity and clarity, working with metrics improved analytical thinking, handling sample comments improved patience, and writing remarks and reports improved communication.

c. Observed Attitude and Gained Values

1. Honesty and responsibility: claims, reviews and disclosures must be true, and the brand must own its mistakes.
2. Respect for the audience: content should give value, protect privacy and treat every person with courtesy.
3. Creativity with discipline: good ideas need a plan, a schedule and approvals.
4. Data-based thinking: decisions on content and budget should be guided by results, not by guesses.
5. Discipline and punctuality: regular reporting at fixed timings and daily attendance records.

d. Challenges Faced

Understanding terms and metrics such as CPM, ROAS, frequency and engagement rate was handled by using a glossary, worked examples in Excel and mentor guidance.

Coming up with fresh content ideas regularly was difficult at first; this was handled by using content pillars, festival lists, competitor and audience insights and a running idea bank.

Designing quickly while keeping quality and brand consistency was handled by using a brand kit and templates in Canva and by taking the supervisor's feedback on each design.

Working without real ad spend and real audiences was handled by using fictitious brands, sample insights and clear assumptions for each calculation.

Maintaining consistent documentation was handled by using daily log entries and reviewing feedback to improve documentation progressively.

Managing time between practice, documentation and report writing was handled by dividing work week by week and using review days for corrections.

e. Career Pathways

The knowledge gained supports careers such as Social Media Executive or Manager, Content Creator, Graphic and Video Designer, Copywriter, Community Manager, Paid Social or Performance Marketing Executive, Social Media Analyst, Influencer Marketing Coordinator and Digital Marketing Executive. Opportunities exist in digital agencies, brands and start-ups, media houses, education and coaching institutes, local businesses and e-commerce companies, and as a freelancer or creator. Related higher-study and certification options include BBA or MBA in Marketing, courses in Mass Communication and Journalism, and professional certifications such as Meta Blueprint, Google Digital Garage and Google Ads certifications. Because social media changes quickly, continuous learning and a portfolio of real work are important.

CONCLUSION

The internship in Social Media Marketing was a valuable learning experience that integrated academic knowledge with practical activity. The programme achieved its objectives through structured learning, guided practice, assignments, supervisor review and documentation.

The student gained a clear understanding of how a social media campaign is planned and run - through platform selection, content calendars, post and reel design, copywriting, hashtag research, audience targeting, paid campaigns, community engagement, analytics and competitor analysis - and acquired practical familiarity with Canva designs, calendars, ad plans and engagement calculations. The experience has strengthened the student's employability and provides a foundation for further study and work in digital marketing and communication.

Reflection

Looking back, the most useful lesson of the internship was that social media success does not come from posting more but from posting with a purpose: knowing the goal, knowing the audience, giving them something of value, answering them when they speak and measuring what happens. The case study showed that thousands of followers mean little without engagement and orders, and the analytics exercise showed how small changes in format, hook and timing can change results. Moving from concept to practice to documentation made abstract ideas concrete, and supervisor feedback showed where understanding was weak. The habit of recording each day's work also made it easier to see progress over the weeks.

Objectives and Achievement

The objective of understanding platforms and goals was achieved through concept sessions and a platform comparison note. The objective of learning content planning and creation was achieved through a content calendar, Canva designs, captions and hashtag sets. The objective of learning audience targeting and paid campaigns was achieved through personas, an ad plan and metric calculations. The objective of learning community engagement was achieved through reply templates and a complaint handling guide. The objective of learning analytics and competitor analysis was achieved through an engagement report and a competitor audit. The objective of developing professional discipline was achieved through daily attendance, supervisor review and report writing.

Future Scope

The knowledge gained can support further study of digital marketing and communication, and careers in agencies, brands, start-ups, media and education. With growing smartphone and internet use in small towns, the popularity of short video, local-language content, social commerce and the use of artificial intelligence tools, trained and ethical social media professionals are increasingly needed, including in Bihar.

Suggestions for Improvement of the Programme

1. Include live practice on demo business pages and talks by social media professionals and local business owners, with appropriate permissions.
2. Continue regular mentor feedback and progress reviews.
3. Provide more project-based activities such as managing a real small-business page for a month under supervision.
4. Encourage students to maintain detailed daily documentation.
